SecDef Bans "Monitored" Phone Calls; Stay Off The Line, Secretaries Are Told

SECRETARY of Defense McNamara has proclaimed a ban on "regular monitoring" of telephone calls.

He has told DoD subordinates and the Services that "all secretarial personnel must be informed that no calls will be monitored without explicit, affirmative instructions for each specific call."

Secretary McNamara's directive, which orders an immediate halt to regular monitoring, declares: "In exceptional cases, where monitoring of a specific telephone call is requested by one of the parties, the other party or parties to the conversation must be made aware that the call is being monitored."

The Services have instructed the field that this policy is to be implemented at all echelons.

It is an open secret at the Pentagon that hundreds of phone calls are monitored each day by secretaries, who make notes for their bosses. Now the bosses must take their own notes.

EIGHT TASK GROUPS:

Army Functions, Organization, Procedures Under Scrutiny

SECRETARY of Defense McNamara, through General Counsel Cyrus R. Vance, has directed the Army to conduct a far-reaching study of its "Functions, Organization and Procedures."

The study is expected to lead to major changes in the Army structure.

The sweep of the task is pointed up with the disclosure that eight groups have been created to monitor key segments of the study task.

Last week's issue of THE JOURNAL re-

vealed that Deputy Comptroller L. W. Hoelscher had been assigned the mission to direct a review of the Technical Services. The possible creation of an Army Logistics Command was mentioned.

At that time, Pentagon officials refused to make available the names of the Hoelscher Committee or to discuss the scope of its work.

THE JOURNAL this week renewed the

Must Expect Soviet Polaris

AN authoritative report on the buildup of the Soviet Navy, highlighted by forecast of a Polaris type submarine, has been presented to the Congress by Admiral Arleigh Burke, Chief of Naval Operations. "The most significant new development," he says, "is the shift in emphasis from the quantitative build-up, which featured the 1947-58 period, to a qualitative improvement."

Admiral Burke, in testimony before the Senate Armed Services Committee, reports that the Red Navy, which numbers about 500,000 men, has about 25 cruisers, nearly 200 destroyer type ships, and more than 400 submarines.

CNO Burke said the current shipbuilding program includes guided missile destroyers. "It is almost certain," he stated, "that the Soviet Union is actively engaged in a nuclear submarine construction program."

"The Soviets have an obvious requirement for nuclear submarines and have the capability to build them," Admiral Burke reports. "It is probable that the Soviets have some nuclear submarines, although it is problematical whether any are yet fully operational."

"A Soviet version of our Polaris firing submarine must be expected in the

Pentagon Legislative Program Falters, Will Need A Big Push

WHAT has happened to the Pentagon's legislative program?

The Congressional session is half over and no major military bill has yet been approved. Only one has won House passage. None has passed the Senate. Many are still hanging fire at the Pentagon or Budget Bureau.

So far, only two minor pieces of military legislation (one, the act restoring former President Eisenhower's five-star rank) have been enacted by both the House and Senate.

The accrual flight pay plan, described as a "must" item in President Eisenhower's January Budget Message, still has not seen the light of day.

The long-delayed revision of the archaic dual-compensation laws, which the outgoing Chief Executive said would be a matter for "priority" consideration by the present Congress, has not yet put in an appearance.

The retired pay recomputation measure, also listed by former President Eisenhower as a "major" item in the Pentagon legislative package, was sent to Congress before the Administration changeover. Capitol Hill leaders have since been notified by the Pentagon that the measure has President Kennedy's support. But the proposal has gathered dust since early in March. No determined effort has been made

Secretary Stahr's O.K. Paves Way For Pentomic Demise

THE Army has decided on a new Infantry division organization to replace the Pentomic structure that went into effect in 1956.

Secretary Elvis J. Stahr, jr., has approved the new division plan submitted by General George H. Decker, CofS. The Army wants to begin the shift from the Pentomic organization in 1963 and complete the task by 1965. Details are reported on Page 2.

Secretary Connally Gives A Speech; Gets Set For Sea Service Action

THE Navy and Marine Corps have been told by Secretary John B. Connally about the progress the Sea Services have made and, more importantly, about the problems they face—from preventing anonymous "leaks" to newsmen to deciding what kind of ships and weapons will be needed in the future.

A WWII Naval officer, Secretary Connally has charted a busy course for himself, and has given a tip-off to the actions he will be considering and ordering in the weeks and months ahead.

He did this in a speech to more than 3500 Navy and Marine Corps officers. The text begins on Page 11.

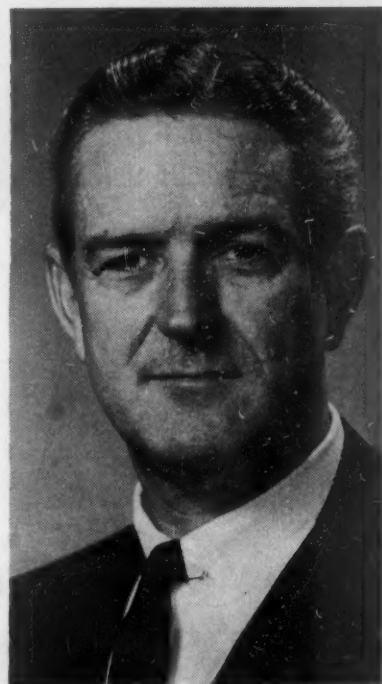

Who Will Copter The President?

THE Army and Marines now share the mission, but it's a question as to which Service—the Air Force wants consideration too—will have the honor of providing future White House helicopter coverage.

Pentagon officials don't want to discuss the matter. They say that no changes are likely for the "foreseeable future," but no one wants to say how long that will be.

Key to the outcome will be choice of a replacement for the H-34 Sikorsky heli-

—Continued on page 2

Scrap Pentomic Divisions, Secretary Decides; Battalions Return

THE Army, beginning in 1963, will abandon the Pentomic organization for its Infantry divisions in favor of a new structure which will restore the battalion.

There will be 10 battalions and three combat commands in the new division.

Secretary Elvis J. Stahr, jr., has approved the General Staff plan to reorganize Infantry divisions to achieve greater flexibility, and has ordered rapid implementation of the decision.

Army plans call for replacement of the

Pentomic units to be completed by 1965.

The new organization will resemble the present Armored division alignment.

The revamped Infantry division—a nickname has not yet been fixed—will have three combat commands as the major elements between the battalion level and the headquarters. The five battle groups of the Pentomic division will be eliminated.

In Europe, it is anticipated that each division will have a mix of about six tank battalions to four infantry bat-

talions.

In the Pacific, the mix will be more like eight infantry battalions and two tank battalions.

Although there will normally be 10 battalions in a division, this is not a hard and fast requirement. The battalion strength will be changed to meet specific combat requirements.

This flexibility is the key to the new division organization.

Each combat command will be capable of directing the action of two or more

battalions and can quickly assume control of others if necessary for completion of a particular mission.

The new plan calls for integration of Army Aviation directly into battalion operations. If funding permits, Army Aviation units would be assigned at the battalion level.

Secretary Stahr's decision to abandon the Pentomic Infantry Division—he made the decision on 12 April—emphasizes the fast pace that is being set in Pentagon decision action. It had been anticipated that at least a year would be required to complete the study of the new division structure and get it approved, but this process has been streamlined to a matter of a few weeks.

As a result of the fast action, it will be possible for the Army to present budget requests for fiscal '63 covering increased procurement for the new divisions.

The Army adopted the Pentomic organization in 1956. It was thought then that the triangular division structure did not meet the needs of the nuclear battlefield. The three regimental organizations was eliminated in favor of the five battle groups.

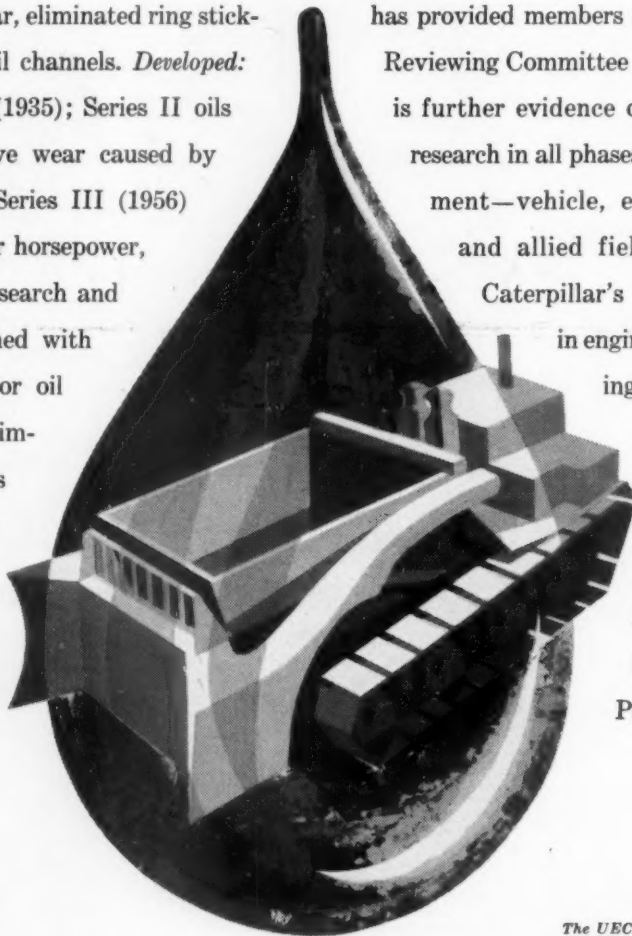

Now the shift will be back toward a triangular concept, with the three combat commands.

CAPABILITY IN POWER AND MOBILITY for defense

Problem: carbon, lacquer and gum deposits on working parts of diesel engines. **Needed:** diesel lubricating oils that minimized deposits, resisted scratching and parts wear, eliminated ring sticking and assured open oil channels. **Developed:** "Superior Lubricants" (1935); Series II oils (1948) to fight excessive wear caused by high sulfur fuels; and Series III (1956) for use in today's higher horsepower, higher speed engine. Research and testing were accomplished with the cooperation of major oil companies. To speed oil improvement, Caterpillar's single-cylinder test engine is now used in 67 laboratories throughout the world. Among other accomplishments,

Caterpillar helped develop the first military oil specifications and has contributed heavily in developing current revisions. In addition, Caterpillar has provided members to Ordnance Engine Oil Reviewing Committee since its beginning. This is further evidence of Caterpillar's intense research in all phases of equipment improvement—vehicle, engine and component and allied fields. Besides research, Caterpillar's experience and talent in engineering and manufacturing are available to meet your requirements.

For more details, write for Bulletin No. 40-20265, Defense Products Department, Caterpillar Tractor Co., Peoria, Illinois.

The UECM, currently under development, is representative of the ability of Caterpillar research in all phases of vehicle development.

White House Copter Mission Discussed

From first page—

copter, now used for White House missions and tagged for evacuation of key Government officials in event of an emergency.

There is much discussion that the Vertol 107 will be selected to replace the H-34.

If this proves the case, the Marines could gain "exclusive rights" at the White House.

The Journal has learned that the Marine Corps HMX1 Squadron at Quantico, Va., which flies the President, is slated to receive four 107's. Delivery dates are not yet firm. There has been discussion about first deliveries in 1963, but there is a possibility this may be advanced to 1962.

The Army has no 107's on order.

The Air Force is hopeful it will be allowed to purchase some.

Army officials told The Journal that there are no plans to replace the H-34 Choctaw helicopter used at the White House.

The Army, which bought three 107's, has ordered no more. Instead, the Army is buying a larger version, the Vertol YHC 1B Chinook. Some experts say this is too large a helicopter for use in the White House mission.

The Army plans to buy 24 Chinooks in fiscal '62; it bought 18 in fiscal '61.

At present, the Army and Marines are represented at the White House by separate, cooperating helicopter detachments. The Army group is its Executive Flight Detachment, headed by Lt. Col. Jack Tinnen and based at Ft. Belvoir, Va. The Marine unit, HMX1 from Quantico, is led by Lt. Col. Edwin O. Reed.

While the Army and Marines have been eyeing each other's future activities and helicopter procurement plans, the Air Force has approached the Navy—the contracting agency for the new Vertol craft—to purchase some 107's of its own. Air Force officials say their service is well equipped to handle the Chief Executive's helicopter needs.

Will Head Reed GH

The Armed Forces Medical Center Director, Brig. Gen. Floyd L. Wergeland, will take command of Walter Reed Army General Hospital in May. He succeeds Brig. Gen. Clinton G. Lyter, who will move up to the two-star post of CG of the Walter Reed Army Medical Center.

Present Commander of WRAMC, Maj. Gen. Clement F. St. John, retires 30 April.

Secretary McNamara Issues "Standards Of Conduct" Directive

SECRETARY of Defense McNamara has issued a directive governing standards of conduct for Defense personnel with respect to acceptance of gifts, use of government facilities, property and manpower. It also covers use of official representation funds.

The directive specifies that no defense

employee shall accept any gift or hospitality "that might reasonably be interpreted by others" as being of such nature that it could affect his impartiality. Nor shall any defense employee use, or permit the use by others, of government facilities, property, manpower or funds for other than official business. This ruling includes the use of special mission aircraft and official motor vehicles.

The text of Directive 1000.8 follows:

SUBJECT: Acceptance of Gifts; Use of Government Facilities; and use of Official Representation Funds

I. PURPOSE

This directive sets forth standards of conduct for Defense personnel with respect to the acceptance of gifts, the use of Government facilities, property and manpower, and the use of official representation funds. Its provisions apply to all military personnel on active duty and to all civilian personnel.

II. ACCEPTANCE OF GIFTS AND USE OF GOVERNMENT PROPERTY

A. Defense personnel shall not

1. Accept any gift, favor or hospitality for themselves or their families from any enterprise or person doing business or seeking to do business with the Department of Defense which might reasonably be interpreted by others as being of such nature that it could affect their impartiality;

2. Personally use or permit the use by others of Government facilities, property, manpower or funds for other than official Government business.

B. The tender of any gift, favor, or hospitality which might be considered to be in the nature of bribery shall be reported immediately through departmental procedures to the Department of Justice and the General Counsel of the Department of Defense. Any questions concerning what might be construed as bribery shall be resolved in favor of reporting the incident.

C. Gifts from foreign governments shall be handled in accordance with DoD Directive 1005.3.

III. OFFICIAL REPRESENTATION FUNDS

Use of official representation funds shall be subject to the approval of the Secretary of Defense, the Deputy Secretary of Defense or the Secretaries of the military departments. Funds are to be utilized only

for official entertainment to maintain the standing and prestige of the United States by extending official courtesies to certain officials and dignitaries of the United States and foreign countries.

IV. USE OF GOVERNMENT FACILITIES, PROPERTY AND MANPOWER

A. Government facilities, property, and

manpower, such as stenographic and typing assistance, mimeograph services, and chauffeur services, shall be used only for official government business.

B. Special mission aircraft shall be used only for official purposes and such use shall be approved by the Secretary of Defense, the Deputy Secretary of Defense, the Secretaries of the military departments, the

Chairman of the Joint Chiefs of Staff, the Chiefs of Staff, Army and Air Force, the Chief of Naval Operations, or the Commandant of the Marine Corps.

C. Motor vehicles

1. Full-time assignment of official vehicles to officials of the Department of Defense at the Seat of Government shall be

BRIG. GEN. Ernest Beverly, Commander, Washington Air Defense Sector at Ft. Lee, Va., congratulates Maj. Gen. Alfred B. Denniston, CG of Ft. Lee and the Quartermaster Training Command, upon the occasion of the third anniversary of General Denniston's command on 14 April.

USAF SCIENCE CHIEF

Dr. Leonard S. Sheingold, Director of the Applied Research Laboratory of Sylvania Electric Products Inc., has been named Air Force Chief Scientist by General Thomas D. White, CofS.

Dr. Sheingold succeeds Dr. Alexander H. Flax, who will return to his former position as Vice President and Technical Advisor of Cornell Aeronautical Laboratory at Syracuse, N. Y.

As Chief Scientist, Dr. Sheingold will have responsibility for providing technical advice on Air Force plans, programs and requirements. The appointment of a Chief Scientist is made for a one-year period.

In September 1958, Dr. Sheingold was appointed a member of the Air Force Scientific Advisory Board by General White. He was re-appointed to that position in January 1960, for a period of three years. He is also a member of the Advisory Group on Electronic Warfare in the Office of the Director of Defense Research and Engineering.

At the request of former Defense Secretary Charles E. Wilson, Dr. Sheingold served as a member of the Defense Department's Weapons Systems Evaluation Group during 1956, and until recently was a consultant to that group. In March 1957, he served as chairman of the Ground Environment Committee during a joint U. S.-Canada meeting on penetration tactics at a Weapons Systems Evaluation Group symposium in Washington, D. C.

During the summer of 1958, Dr. Sheingold was a consultant to the University of Michigan and assisted in the preparation of a long-term combat surveillance research program. He has been a consultant in air defense to the Operations Research Office of Johns Hopkins University.

Bomb Score Unit Moves

The 1st Radar Bomb Scoring Group at Carswell AFB, Tex., will move to Barksdale AFB, La., 1 August and be combined with the 1st Strategic Standardization Group.

The groups will be redesignated the 1st Combat Evaluation Group, responsible for evaluating and analyzing SAC crew procedures and radar bomb scoring.

Pentagon Must Act Quickly On Legislation, Or

From first page—

by the Defense Department to obtain action in either the House or Senate.

The sluggish program is the result of a combination of circumstances, some of which are centered at the Pentagon, some in the Congress, and others at the White House and Budget Bureau.

One of the major Pentagon obstacles is the wide-ranging and time-consuming series of top-level policy studies which has left some of the new Defense Department officials too little time to get

acquainted with the legislative objectives of the Services.

An example of this was Assistant Secretary of Defense (Manpower) Carlisle P. Runge's inability to give a specific answer when asked by a House subcommittee if the Department will seek overhaul of the dual-compensation laws.

Many proposals, including the accrual flight pay plan, the Reserve readjustment pay measure and a uniform ration bill presumably are still in the works, but it has been more than three weeks

since the Pentagon even communicated with the Congress about its legislative plans.

Maj. Gen. Elvin S. Ligon, jr., Director of Air Force Personnel Planning, told a House Appropriations Subcommittee in late February that the accrual flight pay proposal will probably be "delayed" so long that it will not be possible to obtain legislation during the current fiscal year.

While some of the delays may be accounted for by the numerous reappraisals underway at the Pentagon, it also is

Northrop's Laminar Flow Control will enable large aircraft to fly up to twice as far as they now can, and stay aloft proportionately longer, on the same amount of fuel. Or it will permit them to carry heavier payloads over a given distance. And it will accomplish this without increasing the airplane's size, weight, or engine power.

Laminar Flow Control is a revolutionary technique developed by Northrop for reducing friction drag on an

airplane in flight. This drag is caused by the turbulence of the boundary layer of air as it flows over the surfaces of the plane. By drawing off this turbulent air through paper-thin slots in the aircraft skin with a suction system, and exhausting it in the direction of thrust, a smooth "laminar flow" of air is obtained.

The implications of Laminar Flow Control are far-reaching. To commercial operators it can mean substantial cost savings on long distance flights, and make

Or Face Prospect Of Little Action At This Session On Capitol Hill

conceivable that Defense Department leaders feel they are under no pressure to move the program.

The House and Senate Armed Services Committees are currently involved in detailed hearings on the new authorization measure for aircraft, ships and missiles, and were tied up earlier with hearings on the military construction authorization bill. Some Pentagon proposals received at the Capitol (such as the proposed changes in the Uniform Code of Military Justice) have not even

been introduced in either House, and it is apparent that no real legislative progress will be made until work is completed on the big weapons authorization measure. This may not be before the first week in May.

The House Committee meanwhile has reported the military construction authorization measure, and the Senate Committee has ended its hearings on the measure but has not yet completed final action.

Additionally, the House Committee also

has reported the Navy proposal changing the resignation rules for Regular NROTC (Holloway Plan) officers, as well as the all-Service measure to provide for more effective Reserve participation, and has completed most of the spadework on the bill amending the Uniformed Services Contingency Option Act.

But much remains to be done, particularly on those measures which have not yet emerged from the Pentagon. If the "major" bills and "priority" measures are expected to receive consideration

during the present session it is obvious that their transmission to the Congress cannot be delayed much longer.

Some of the delay may be attributed, of course, to the White House and Budget Bureau where the programs entailing expenditures must be carefully considered in connection with the overall Federal spending program.

One measure which the Defense Department could be pushing, however, is the retired pay recomputation plan, for which funds were included in the Eisenhower budget and to which the new Administration has given its backing.

The delay here may be due to the fact that Senator John C. Stennis (D-Miss) of the Senate Armed Services Committee refused to act on the measure last year until an independent study of retired pay could be completed. The study, which was initiated in December has a target-completion date of late June, which could be too late for action by the Congress this session unless the House is urged to go ahead on its own as it did in the previous Congress. Thus, if the Senate takes up the measure and reports a bill, the legislation could go directly to conference, thereby saving valuable time.

Whatever the solution to the many problems involved, and even though no major share of the blame can be attributed to any single trouble spot, the military legislative program is not moving as fast as it should. Unless steps are taken to speed it up, there is reason to believe that little major Armed Forces legislation will be enacted by the first session of the 87th Congress.

One Third Chosen For Regular Ranks

Approximately one-third of the Air Force officers applying for regular appointments in the 1961 three year group program—546 out of 1,795—were selected.

The Air Force has announced also selected as regular officers of 213 USAF Academy graduates, 47 Naval Academy graduates, and 55 US Military Academy graduates. The same selection list covered the regular officer selection for 486 Distinguished AF ROTC graduates and the augmentation of 32 other officers in the various components of the Air Force, Medical Corps, Dental Corps, Judge Advocate General, etc.

The selection board chose 30.4% in the three year group applying for regular commissions. Of this total, 93.6% held college degrees.

This selection board action pertains to the 1961 augmentation program and is not linked directly to President Kennedy's announcement last week that regular Air Force officer manning strengths had been raised to 69,425 authorized billets.

Pentagon officials said that the Presidential action "will not herald immediate and widespread regular officer augmentation."

The effect of the President's action will be along the lines of long-term future personnel planning.

The Air Force said the action "will dove-tail into personnel blueprints to convert junior officers from Reserve to Regular status in the immediate future."

I WOULD LIKE TO INTERVIEW

... a former officer under age 45, and preferably retired, who wants to consider a worthwhile business opportunity. This man should have a reasonably good education, a genuine interest in selling and preferably some executive experience. We are prepared to invest considerable money in the right man. If interested in a career opportunity write giving full information, including telephone number, to Box No. 250, The Journal, to arrange for a personal interview.

More sky per gallon

possible non-stop flights over greatly increased distances. To the military, it will be immensely important for surveillance and airborne alert missions, or for any operation requiring aircraft to stay aloft over long periods. On logistic missions, planes can fly in and out of trouble spots without refueling. Dependence on overseas bases will be reduced.

Northrop is conducting a continuing research program for the U.S. Air Force to investigate the applica-

tions of Laminar Flow Control to many kinds and phases of flight. Two airplanes are now being modified under a separate Air Force contract to demonstrate the practicability of this new aerodynamic technique in day-to-day operation.

NORAIR
A DIVISION OF
NORTHROP

AIR FORCE CADETS GO AIRBORNE

APPROXIMATELY 80 Air Force cadets have volunteered to attend a three-week basic airborne course at the Army's Infantry Center, Ft. Benning, Ga., beginning 17 July. Graduates will be awarded the Army's Parachutist's Badge.

This summer's training will mark the fourth year Air Force cadets have undergone airborne training at the Infantry School. The first group attended in 1958 when 38 earned jump status. In 1959, 39 went to Ft. Benning to qualify and 33 went in 1960.

Of the 120 cadets, 119 completed the course and were awarded the Parachutist's Badge, which Air Force regulations permit them to wear. One cadet in the 1959 group suffered an injury to his ankle and could not finish the training.

This year's group, like those in the past, will be assimilated into a regular class of Army personnel for the airborne training.

"Space Czar" Urged By Rep. Stratton; Suggests M/G Medaris Or VAdm. Raborn

REPRESENTATIVE Samuel S. Stratton (D-NY) has called for reorganization of the nation's space effort with "a single head or space czar" taking over operational control of the entire program.

The House Armed Services Committee member has urged that either Maj. Gen. John B. Medaris, USA-Ret., or VAdm. William F. Raborn, jr., be tapped for the assignment.

General Medaris headed the Army's space and missile effort at Redstone Arsenal, Ala., before his retirement last year. Admiral Raborn directs the Navy's Polaris organization.

Congressman Stratton said both officers have demonstrated their "ability to cut bureaucratic red tape and get things done."

He also told the House he thinks it was a "serious mistake" for the Government to try to "draw an artificial line between the peaceful and the military applications of space science."

He said: "It is time now to rectify that error. I believe that our space activities should be combined into a single agency and placed under the operational control of a single head or

space czar."

Congressman Stratton said the Soviet feat in putting a man into orbit around the earth has "serious implications for the future of our national security." It cannot be too long, he said, before the Soviets "will also have the capability of putting a nuclear weapon into orbit around the earth too, and bringing it back on some predetermined target."

He told the House it is essential to "take another look at our space organization and take the steps to bring it more nearly into line with the urgent challenge to our security which we now face."

SIGNAL LAB CHIEF

Col. James M. Kimbrough, jr., has been appointed Commanding Officer of the Army Signal Research and Development Laboratory, Ft. Monmouth, N. J.

He will replace Col. Harold McD. Brown, assigned to the Seventh Army in Europe.

Colonel Kimbrough, USMA '35, has been Executive Officer, J-6 (Communications-Electronics), JCS.

Colonel Kimbrough has resided at 1806 North Hancock Street, Arlington, Va., with his wife and three children, Julia, James M. 3d, and Graham.

Army Navy Air Force Journal
22 Apr. 1961 (Vol. 98, P. 963)

Minuteman Chief Wins First Star

President Kennedy has nominated Col. Samuel C. Phillips, Director of the Minuteman Systems Program, AF Systems Command Ballistic Systems Division, Inglewood, Calif., for promotion to temporary brigadier general.

Also nominated for advancement to brigadier general were Col. Howard W. Ohlke, Commander of SAC's 18th Air Division at Fairchild AFB, Wash., and Col. Don S. Wenger, Chief Professional Consultant to the USAF Surgeon General, Maj. Gen. Oliver K. Niess.

Board Will Screen 9000 AF Colonels

A board will convene 15-27 May at the Air Reserve Records Center, Denver, to consider approximately 9,000 Reserve officers for promotion to colonel. The board will consider both EAD and non-EAD eligibles.

Officers must hold a promotion service date on or before 30 June 1956, and be in an active status to be considered.

Eligible officers who wish to submit communications under the provisions of Section 8362, Title 10, U.S. Code, should write direct to President Reserve Officer Promotion Board, Air Reserve Records Center, 3800 York Street, Denver 5, Colo. When writing to the Board President, non-EAD officers should include a statement of intent as to willingness to be assigned to a reserve unit if one were available. All communications must arrive prior to the date the board convenes.

Col. Nye Named I. G.

Col. David B. Nye has been appointed Fifth Army I.G. at Chicago. He succeeds Col. Ralph D. Maxfield, USA-Ret.

BURIED BUT ALIVE

Hidden in the earth, the Air Force Minuteman missile must remain ever ready. Though untended for weeks, months, even years, each of its thousands of components must function perfectly together if the button is pushed. This is the new order of reliability being fulfilled by Autonetics—designer of the Minuteman's critical guidance and control system.

Army Officers Decorated By AF For Construction On ICBM Site Projects

Four officers of the Army Corps of Engineers have received the Air Force Commendation Medal for outstanding work associated with the construction of ICBM sites.

The four Army pioneers in missile site construction are Col. Thomas J. Hayes, III, Vice Commander of the Corps of Engineers Ballistic Missile Construction Office (CEBMCO) at Los Angeles; Col. Sidney T. Martin, Cheyenne Area Engineer, Wyoming; Lt. Col. Clifton H. Chamberlin, Jr., Chief of the

Engineering Division, CEBMCO; and Lt. Col. Allen W. Sanders, Jr., Chief of the Propellant Loading System Division, CEBMCO.

Colonel Hayes was cited for his work both as Chief of the Los Angeles Field Office, the forerunner of CEBMCO, and as Vice Commander, CEBMCO.

The medals were presented by Brig. Gen. William E. Leonhard, Deputy Commander for Facilities of the Air Force Ballistic Missile Division at Inglewood, Calif.

ARMY ORDERS:

M/G Walker Under Orders To VIII Corps; Two Professors Named At West Point

get your INVESTMENT facts straight

The new booklet, "Investment Facts," should be "must" reading for servicemen and women planning their financial futures now. It's informative, timely, easy to read—and among its features is a listing of stocks that have paid cash dividends every three months for 20 years or longer.

"Investment Facts" is recommended by the Armed Forces Department of Harris, Upham & Co., the nationwide brokerage firm which has served investors for more than 60 years. And, as part of its specialized investment service, Harris, Upham offers copies of this booklet free to military personnel.

So, to get the facts on investing—and to get them straight—simply fill out and mail the attached coupon. There's no obligation, of course.

ARMED FORCES DEPARTMENT, HARRIS, UPHAM & CO.

1505 H Street, N.W., Washington, D.C., Att. General John E. Dahlquist, USA Ret.

Gentlemen: Please forward promptly a free copy of "Investment Facts" **AJ**

DoD and Congress Must Give Legislation A Push

It is time that the Defense Department begins showing a sense of urgency concerning the necessity for Congressional action on the backlog of important military measures now before the legislative committees.

A number of these, such as equalization of retired pay, carry the endorsement of both the Eisenhower and Kennedy Administrations; yet the White House and Pentagon have been so preoccupied with "reappraisals" and "new looks" at the defense structure that they apparently have not had the time to press for the enactment of some of the basic requirements needed to keep the defense machinery functioning efficiently.

As the review of the status of the defense legislative program published on the first page of this issue reveals, virtually no progress has been made in the first four months of the new Congress.

We urge Chairmen Richard Russell and Carl Vinson of the Senate and House Armed Services Committees to call Defense Department officials before them and to run through the list of pending measures, particularly the pay equalization project, to the end that these bills may be brought up for passage before this first session adjourns for the Summer.

Secretary Connally Demonstrates Leadership

Secretary of the Navy John B. Connally, jr., in his notable address to more than 3500 Navy and Marine Corps officers (see next page), has demonstrated a high order of leadership. A veteran of WWII aircraft carrier duty, he has communicated to the Sea Services just what he expects of its members and also what they can expect of their civilian chief.

He has outlined a broad range of problems which confront the Navy and Marine Corps in a period of rapid technological development, and he has emphasized the need for maximum teamwork in finding the answers to questions.

Secretary Connally's remarkable speech needs no paraphrasing here. It is a beacon of leadership. We hope that it will provide enlightenment to the entire Defense Team. Said Secretary Connally: "I realize that as Secretary of the Navy I must fight for and be loyal to the officers and men of the Navy and Marine Corps. It is my view that the flow of loyalty down through the ranks is the prime requisite of loyalty up through the ranks."

National Guard Report Shows Progress

An excellent picture of the National Guard and the progress it has made over recent years is contained in the Annual Report of Maj. Gen. Donald W. McGowan, Chief, National Guard Bureau, now being distributed.

The report comes at an opportune time when the status of both the National Guard and the Reserve Forces are being reviewed in the Department of Defense.

The National Guard Bureau itself holds an unusual position for it is both a staff and an operating agency and is a joint Bureau reporting to both the Secretaries of the Army and the Air Force and to the Chiefs of Staff of both forces. As an operating agency it is the channel of communication between the States and the Departments of the Army and the Air Force.

The 400,000-man Army National Guard is nearly half the size of the entire active Army. The Air National Guard has 71,000 trained officers and boasts the highest reenlistment rate of any military force in the nation—84 percent. The Army National Guard comprises 4,400 units with 21 infantry and six armored divisions, nearly twice the number of divisions in the Active Army. In addition the Guard operates 52 Nike missile batteries. The Air National Guard has 22 combat wings with 40 Air Defense Squadrons, 36 tactical fighter and reconnaissance squadrons.

Elements of 20 fighter interceptor squadrons and four Aircraft Control and Warning Squadrons are daily augmenting the active Air Force Defense coverage. The Air National Guard also has two transport wings with six heavy transport squadrons plus ten support flying squadrons.

These are formidable forces. Any Departmental study should be aimed to make the utmost use of these devoted and skilled organizations.

Readers' Views

"White Charger" Comment

I have, on several occasions in recent months, discussed with officers the recent "White Charger" legislation which is causing the forced retirement of many senior Navy Captains. Most of those with whom I have discussed this matter feel that the concept is wrong but, they add, "It's now a law and nothing can be done about it." My comment has been that I don't agree. If the law is wrong, it can be changed—and should whether it affects one officer or a thousand.

In addition to the exacting job of selecting Captains to Admiral the selection boards the past two years were assigned the duty of selecting out 35-40% of the Captains, duty in the prescribed year groups.

The first question to be asked is, why the figure 35-40%? The answer is probably that this was the figure fixed by Congress on the recommendation of the Navy Department.

It has been said that these officers were never subjected to real selection, but isn't it a little late to start selecting them out on a fixed percentage basis when they have 25 or more years of honorable commissioned service and are trying to raise and educate a family?

Would it not have perhaps been better to have gone to Congress and said—"The Navy has a hump problem and an excess of Captains; therefore legislation is requested that will permit selection of a greater percentage of officers than normally allowed while we phase out over a period of 7 years our excess Captains? We will pluck only those who are not performing up to standard in their present rank."

Have we placed too high a price tag on success? Before WWII, we had LCDrs. serving dignified and honorable careers in the Navy. Now we seem to have the view that everyone must get to the top as fast as possible. Must every Ensign be a potential Admiral or must he be a potential Lieutenant? Are we selling wartime experience and maturity short in pushing the "Youth Movement?"

A few of the officers who have been plucked were serving in top commands. What does this do to the morale of a command when the Captain has been plucked? What effect does this have on the junior officers' desires with regard to making the Navy a career? Is it not time that we stopped considering being passed over or plucked as a disgrace?

In the civilian world a vice president of a company may serve honorably in that capacity without ever becoming president. Why can't an officer serve honorably terminating his career as a Captain or Commander without the gnawing stigma of being passed over hanging over him and his family? Do we need a psychological readjustment with regard to selection?

These are searching questions which remain unanswered. This July 35-40% of our Captains in year groups 1935-36 will be forced to retire. Do they not deserve an answer to the one question they have in common—Why?

Perhaps the same sense of fair play which has caused you to champion matters of this nature in your editorials and letters column will also prompt you to look into this. I hope so.

In closing, the writer wishes to state that he was subjected to reselection and is not among those who have been plucked. The comments in the foregoing paragraphs are my personal views based upon observations of the effect the White Charger legislation has had on contemporaries who have received Dear John letters.

CAPTAIN, USN

The Importance of People

Many will thank your paper for its wonderful editorial [on retired pay equalization] of April 8.

It is hoped there has been afforded The President, General Eisenhower and all members of Congress the opportunity to read this editorial.

I am sure, both houses of Congress, if given the opportunity will easily pass this legislation at any time.

Speaking of gaps, the closing of the "retiree" gap is important to our country's safety and to all retirees, present and future. Now, the future ones could also become a second class retiree.

After all, Service personnel are more important than any weapon they may use.

It is hoped that one Senator realizes the foregoing and also that equal treatment of personnel, per se, is a must, and has no place in an overall study of the military.

O Tempora; O Mores!

IN THE JOURNAL

Marine Commandant's Place On JCS; Customs Sights Navy Ships; Iron-Clad Report Printed

10 Years Ago—With the official opposition of the Secretary of Defense, the Secretary of the Navy, and the Chief of Naval Operations, protagonists of the Marine Corps, including two former USMC commandants, this week urged the Senate Armed Services Committee to support the bill . . . fixing the strength of the Corps and making its Commandant a permanent member of the Joint Chiefs of Staff.

50 Years Ago—In the future, vessels of the U. S. Navy entering home ports from foreign countries will be boarded and examined by customs inspectors. An order made public at the Navy Department 19 April provides for formal notice to the Collector of Customs of the arrival of a vessel, an inspection of baggage and assessment of duty upon all more than the exemption of \$100 for wearing apparel and personal effects.

97 Years Ago—The reports on iron-clad vessels by Rear-Admiral Porter and Commodore John Rodgers, which are given elsewhere in this issue, present many facts of interest to all Navy men and no less to every citizen who follows the progress of naval science. In this country alone has the iron-clad question been discussed in actual and extended practice under the guns of the enemy, and here alone are to be found the men best qualified to give evidence upon the merits of the different classes of vessels and of armoring.

SecNav Connally Gives The Word; Asks Some Powerful Questions

LET me say first that it is a great privilege to meet with you. I have looked forward to this occasion as I have no other since I became Secretary of the Navy.

Today I am taking a very unusual step. It is a step to which I have given thoughtful consideration. To my knowledge no previous Secretary of the Navy has called a meeting such as this. In so arranging to talk directly to our Navy and Marine Corps officers of all ranks, let me assure you that my purpose is not to undermine military discipline and the chain of command, but to strengthen them.

And let me make absolutely sure you understand thoroughly that I do not intend my remarks today to disparage any individual. I would be more than foolish if I attempted to impose military judgments on those who have spent their lives preparing to make such judgments.

It is my purpose to talk to you today in your capacities as officers of the Navy and Marine Corps of the future. It is you who will lead the services in the future, you who must contribute ideas to the future Navy and Marine Corps and you who must largely decide what kind of a Navy and Marine Corps we will have.

Why else have I called you here today? Unfortunately, I will never have the pleasure of knowing well all of you here today. Even so, I will never have the opportunity of meeting the vast majority of the officers and men of the Fleet and of our Marine Corps Field Activities.

It does not seem right to so conduct the affairs of my office that I present myself and my views to you solely through written memoranda and orders. I feel it is my duty to talk with you and through you to all officers and men of the Navy and Marine Corps.

There are many things on my mind that I want to convey to you. And in so conveying my thoughts I know that I will be helped in the sense of a man who, in seeking a way to meet heavy responsibility, finds strength in seeking the counsel and help of those around him.

Let me discuss with you this morning some of my thoughts regarding our responsibilities and some of the means we might use to better the increasing demands being placed upon us.

CONCEPT OF DUTIES

I am deeply conscious of my duties and obligations as Secretary of the Navy and I approach them with humility.

I approach these duties also with personal warmth. Having been privileged to serve as a Naval officer for four and a half years during World War II, I do not feel as a stranger among you.

Since assuming these duties, the readiness of the Navy and Marine Corps of 1961 to cope with almost any conceivable circumstance has impressed me deeply. I have been impressed, also, with the tremendously complex character of our whole defense establishment.

The three months' study I have made of the threat our country faces and the means we have of coping with that threat does not qualify me as a military expert. I hope and believe that my immediate position can best be labelled as that of an unbiased person, well enough informed to make judgments, and sufficiently objective not to reject new concepts and ideas.

And I realize, that as Secretary of the Navy I must fight for and be loyal to the officers and men of the Navy and Marine Corps. It is my view that the flow of loyalty down through the ranks is the prime requisite of loyalty up through the ranks.

I must have your help and with it I intend to make whatever constructive improvements are possible, without particular regard to past customs or outmoded usage.

CHANGE

As has been said before, there is nothing constant except change.

However secure and confident we may be in the Navy and Marine Corps capabilities and essentially, we need not resist change simply because it is change. (Let me hasten to add we should resist change when it is simply for the sake of change.) When wisdom dictates change, we must anticipate it; seek it; plan it; guide it; urge it; use it to increase our capabilities. The Navy has always responded to challenge; the challenge of change is unending.

The Navy has been here a long time—from ships of sail through ironclads and side wheelers to ships propelled by nuclear power. However, let us beware of trying to completely identify all aspects of the Navy of the future with the Navy of the past. Let us not permit our thinking to so set in mental concrete that we cannot move forward. Do not forget that a POLARIS submarine was but a dream five years ago.

If you believe, as do I, that our Navy

and Marine Corps are bound to benefit from changes, then we are in harmony and we are in position to make a major contribution to the Navy and Marine Corps I visualize.

It is a high privilege to be able to have a hand in molding this force for freedom. Ideas and initiative are vital. Ideas cause the forward movement we want in the Navy and Marine Corps. I call upon each of you to exercise your initiative, to move your ideas out into the open with boldness and courage. They are important.

RE-EXAMINATION

This morning, I call not for radical departure from time-tested traditions and procedures—but a vigorous soul-searching. This is a procedure that is normal, healthy, and, in these days, essential.

We must ever re-examine. During each day that passes we must stand back and objectively view our own efforts, our work, our programs, and our plans.

We must ever remain receptive to ideas and suggestions that will help us carry out our responsibilities with the utmost effectiveness.

We must ever test our own objectivity. We must reach for the stars, but with our feet on the ground.

If I can do nothing more than stimulate your imagination and initiative, this day will be a success.

The judgment that is required is both delicate and bold. It is a judgment that takes a foothold in the past, but steps forward surely to the future. And above all, it is a judgment that avoids prejudice—prejudice in all of its hundreds of manifestations.

Ladies and gentlemen, the hour is late and the threat is total. We must all assume our obligation to insure peace in the world and we must work for its finest fulfillment for your children and mine—and for free people, or those who seek freedom, everywhere.

No one man has the total professional wisdom to judge precisely our course and speed. But each of us can help through our own personal, total dedication—by a new and bold examination of Navy-Marine Corps problems against total national defense problems.

FUTURE OF NAVY AND MARINE CORPS

I would not so strongly stress the need for re-examination if I were not absolutely convinced of the need our country has for a strong and versatile Navy and Marine Corps.

The Navy and Marine Corps have glorious pasts. I know that they have glowing futures. There is no doubt in my mind whatsoever that the Navy and the Marine Corps have increasing—not decreasing—roles in national defense.

IMPORTANCE OF SEA POWER

I see no substitute for sea power—one generation—or a dozen from now.

Civilization has invariably followed the sea routes since the dawn of recorded time.

The earliest recorded example of this eternal link between the affairs of mankind and the oceans comes down to us from Crete, the forerunner of the Greek-Aegean civilization. Crete was the first classic maritime power. History does not give us the reasons for it, but some great naval disaster, which deprived the Cretans of control of the sea, resulted in their downfall.

Since time began, it has been the sea, as much as the land, which made neighbors. This relationship is particularly true here in our own hemisphere. It is the ocean routes, which truly join the North and South American continents. This phenomenon is also true in the old world, where the Mediterranean links countries otherwise separated by land masses.

In short, because water bodies are often used for defense, they are often thought of only as barriers instead of connectors. History has proven that the proper use and control of the seaways, simultaneously as barriers and connectors, is invariably the mark of a young and growing civilization.

Conversely, the lack of this faculty has caused disintegration or stagnation throughout history. The Persian Empire never recovered from the loss of the naval battle of Salamis in 480 B.C. The decades known as the "Golden Age of Athens" began to decline only after the disastrous naval expedition to Sicily in 415 B.C., and a decisive naval defeat in 405 B.C. Medieval and modern history hold many other such examples.

The point is, America today is a maritime nation, dependent upon the seas for existence and protection. Maritime power, ap-

THIS is the text of the address delivered by Secretary of the Navy John B. Connally, Jr., last week before an audience of more than 3500 Navy and Marine Corps officers in Constitution Hall, Washington, D. C. It is one of the most important pronouncements of Sea Service doctrine in recent years.

Secretary Connally punctuated his presentation with a series of questions. They included these topics:

- Is The Selected System Wrong?**
- Should There Be More Special Projects Offices?**
- How Can ASW Effort Be Improved?**
- Why Not More Power For the I.G.?**
- What Is The Future Surface Weapon?**
- How Can We Become More Open-Minded?**
- Need For Missile Characteristics Board?**
- What's Wrong With Recruiting?**
- Does Physical Fitness Need More Stress?**

PERSONAL CHALLENGE

People are the key to our success.

As Secretary of the Navy, I believe it my duty to say to you as the leaders of our Navy and Marine Corps that you are first, dedicated Americans.

Second, that you are dedicated officers of the United States in whom the President of the United States has placed special trust and confidence in the protection of our nation.

Third, you are—and you must be—Navy and Marine Corps professionals. You must be the world's best.

I view you not as line officers or submariners or aviators, infantrymen, artillerymen or specialists, but as members of the Navy-Marine Corps team charged with a multitude of missions and the responsibility for carrying them out.

You must bring dedication, imagination, stamina, and enthusiasm to your work every day.

In return, I will say to the responsible leaders in government and to the people of this country that you are trained and dedicated to the protection of peace throughout the world.

I will say this in such a way that there will be a realization of the contributions your services have made in the past and that you as individuals are making today.

I will tell them that you are devoting your lives to the preservation of our homes and to the future of our children and this nation.

SERVICE

Each of you had your personal reasons for joining the Service. Uppermost among those reasons must have been patriotism or you probably would not have joined, no matter what the other reasons were. In addition, you knew that you were entering a life of service to your country, and that there would be many times when your devotion to duty would be tested. You knew that there would be sacrifice. And so must it be.

Realizing this, may I assure all of you that your best interests are foremost in my mind and I hope you will be able to see this interest reflected by my actions.

OFFICER CORPS

We must maintain an officer corps that

—Continued on page 20

plied at the right time, in the right place, and with the right amount of force is vital—just as it always has been since time began. We ignore this lesson of history at our own peril.

I firmly believe the importance of Sea Power is increasing with each passing year. Possibly even more significant, I believe Americans are becoming more aware of this fact and recent events bear out this conviction. It is evident that there is a growing awareness that situations such as Lebanon, Laos, and Taiwan Straits may increase in the future instead of lessen.

This awareness is reflected in President Kennedy's amendments to the 1962 budget. In that connection, many of you certainly deserve much credit for having shown that our Navy and Marine Corps have the ability and the versatility to meet our changing national defense needs.

ELEMENTS OF FUTURE NAVY AND MARINE CORPS

Though there are bound to be changes in the fundamental balance and structure of our forces, I do not see any major missions of the Navy or Marine Corps that are not vital to the nation.

The future of the manned aircraft is excellent. In limited war we will still need to depend upon a pilot's eyesight and judgment to find targets, to evaluate them, and to assess damage done to them. The advent of Polaris does not dim this need.

The Polaris system will contribute substantially to providing a deterrent—retaliatory force, but will not replace any other naval weapon—either manned aircraft or attack type submarines. We need them all.

If any one current development could be called significant, it is the realization that our most probable call to battle will be that resulting from the nibbling, tantalizing tactics of potential enemies to test our will in brush fire or limited war situations. And here—as we have for years—the Navy-Marine Corps air-sea-ground teams excel. They will be needed badly, and new ideas and concepts for amphibious assault will find a fertile field.

And last, but not least, surface ships will be with us—the cruiser to carry the bulky, high powered, heavy air defense radars and missiles and the destroyers to do everything.

A moment's reflection should assure you that there is a future in every major field.

MEMO--

A NEW RESTRICTION has been imposed on release of information about missile firings. The Pentagon order affects the Services and Industry. They have been told that henceforth "information concerning missile firings conducted in remote areas and not within public view or access will not be released" unless authorized by the office of Assistant Secretary of Defense Arthur Sylvester. The Pentagon order, promulgated under the classification of "For Official Use Only," declares: "This action applies primarily, but is not restricted to, to missile firings conducted at sea or from remote areas not accessible to the public. Schedules concerning such firings, background information and briefings, and results of such firings hereafter will not be released."

THE NAVY HAS BEEN UNABLE to announce publicly the success of a 19th undersea firing of the Polaris missile. The official tabulation is 18. Mr. Charles Corddry, military affairs authority of United Press International, reported the 19th shot in an exclusive article which revealed that 8 of the Polaris shots had been failures, and that the cause of the difficulties had been detected.

IT BECOMES INCREASINGLY APPARENT with the passing of each week that Secretary of Defense McNamara and Assistant Secretary Sylvester—surely with full White House support—are striving to increase the amount of information which they believe should be withheld from the public. This approach is applicable over a broad range of topics. They include such security sensitive areas as missile firings and such non-security but highly "sensitive" areas as drill pay funds for the National Guard and Reserve, and the reorganization of the Army's Technical Services.

IN ANOTHER TIME, it would have been possible for *The Journal* to make known to our readers the complete terms of reference of the Army Reorganization Study (see Page 1). In those by-gone days, it would have been possible to obtain from authoritative sources and to publish details as to how this important mission would be performed.

THE GROUND RULES ARE DIFFERENT these days. They are based on the attitude that newsmen should not write stories about official matters that are still in the discussion stage. In this newsgathering environment, *The Journal* was rebuffed in efforts to obtain an interview with Deputy Army Comptroller L. W. Hoelscher, who is leading the Reorganization Study. An aide said Mr. Hoelscher was eager to discuss the project, provided proper clearance was obtained.

THE ARMY SAID it could not arrange such an interview without a green light from DoD. The explanation given was that the Hoelscher Committee was created in response to a request from DoD General Counsel Cyrus R. Vance. He was acting on Recommendation No. 80 of Secretary McNamara's list of 104 projects (*The Journal* 15 April). No. 80 calls for a study of the Army organization, with emphasis on the Technical Services.

DoD WAS ASKED if it could arrange the Hoelscher interview. The answer came back that this was an Army matter. The Army, approached again, repeated that it could not move without DoD approval, particularly since DoD had been asked to endorse such an interview. And so it went as *The Journal* deadline approached and passed.

THE PASS-THE-BUCK ACTION on the Hoelscher Committee parallels what is going on in connection with the Service comments on the published Bolté Report. This is another non-security but highly sensitive matter.

DEPUTY DEFENSE SECRETARY Roswell L. Gilpatric, a former Under Secretary of the Air Force who has been involved in his fair share of personnel controversies at the Pentagon, believes that an embarrassing, inter-Service dispute would come to public light if the Army, Navy, Air Force, and Marine Corps were permitted to discuss their position on the proposed revision of promotion and retirement laws. He's right. That's why he put out a directive which forbids discussion of Service comments on the Bolté document.

MR. GILPATRIC'S DIRECTIVE prevents the Army from saying why it opposes proposals in the Bolté Report which would lead to a loss of 249 lieutenant colonels and more than a score of general officer billets. The Army cannot say aloud what it believes, namely that the present promotion system is working satisfactorily and should not be changed radically to meet Air Force and Navy "hump" problems.

THE AIR FORCE is pleased with the Bolté Report, but Secretary Eugene Zuckert cannot explain on the record why his Service favors a single promotion sequence for temporary and permanent ranks. Because it has been given special approval to seek Congressional relief for its promotion program, the Air Force will be able to document further its stated need for 4826 more lieutenant colonels.

THE NAVY TAKES THE POSITION that no major compromises should be made with the original Bolté Report. The Navy says—privately of course—that it strongly favors implementation of the whole report, but would oppose half-way measures. The Navy says it must be given authority to create additional flag officers if the provisions for automatic promotion of rear admirals lower half (brigadier general) to rear admiral upper half (major general) are repealed.

WHAT IS NOTEWORTHY about the Bolté Report and the Army's great opposition to it is the fact that the Chairman of the all-Service Committee of senior retired officers which wrote it is a former Army Vice CofS, General Charles L. Bolté, USA-Ret. When the Report was completed, he met with newsmen to discuss at length all of the recommendations, and to acknowledge freely that there had been and would continue to be differences of opinion on this problem.

IF THE PENTAGON LEADERS support the Eisenhower-proposed Bolté Report, it would seem that they would do well to encourage public discussion of the proposals. That policy was most successful in connection with the sweeping changes in military pay proposed by the Cordier Committee. If the Bolté Committee work is kept under wraps, the suspicion will grow that something has gone sour with the Report.

THE AF FLIGHT TEST CENTER Commander at Edwards AFB, Calif., Maj. Gen. John W. Carpenter, III, will be reassigned to the Pentagon in July. He will become Deputy Director of Plans. Two MATS brigadier generals, Richard F. Bromiley and James C. Sherrill, will get new duties. General Bromiley will move in July from command of the 1501st Air Transport Wing at Travis AFB, Calif., to become Deputy Commander of the Western Air Force there. Also in July, General Sherrill will leave Scott AFB, Ill., where he is MATS CofS to take command of the 1608th Air Transport Wing at Charleston AFB, S. C.

THE AUSTRALIAN AIR FORCE will purchase 30 French Mirage III jet fighters to replace the RAAF's Avon-Sabre aircraft. Deliveries will begin in '63. The Mirage will be tested with a new British Rolls Royce engine.

ANOTHER REPORT FROM AUSTRALIA tells of plans for a USAF Task Force of 170 to 180 airmen to return there in late April to conduct another series of air sampling tests south of Victoria. The Australian Ministry of Defense said the USAF Task Force will include U-2 aircraft from Laughlin AFB, Tex., and JB-57 aircraft from Kirtland AFB, N. M.

THE VICE CHIEFS OF STAFF of the Army and Air Force, General C. D. Eddleman and General Curtis E. LeMay, were at Nellis AFB, Nev., this week to watch a demonstration staged by the Tactical Air Command. Also present from the Pentagon was Lt. Gen. D. C. Strother, Air Force Deputy CofS for Operations. As revealed in last week's issue of *The Journal*, the Pentagon is working on a plan in which the Army would have control of 11 TAC squadrons. The Army must tell the Air Force what kind of aircraft it wants for close support missions.

GENERAL EDDLEMAN SPARKED the work of the Army General Staff and other Army agencies which led to the approval by Secretary Elvis J. Stahr, jr., of the new Infantry division (see Page 2). It had been thought that the study would take many more months to complete, but the Vice CofS expedited the project in order that the first changes in the division could be reflected in the fiscal '63 budget.

ARMY OFFICERS WILL BE PLEASED that the battalion unit will be restored. In the Pentomic division, the battalions were eliminated. With this action, hundreds of Army officers lost an opportunity for combat command at the lieutenant colonel level. In the Infantry division, there is now no command opportunity from captain until colonel.

A GENERAL'S SON, Maj. Gen. Walter K. Wilson, jr., CG of the Engineer Center at Ft. Belvoir, Va., has been named by President Kennedy to succeed Lt. Gen. Emerson C. Itschner, USA-Ret., as Chief of Engineers. General Wilson, 54, USMA '29, is the son of the late Major General Wilson.

NEW ARMY AG will be Brig. Gen. Joe C. Lambert, now the AG at SHAPE. Nominated by President Kennedy for two-star rank, General Lambert will replace retiring Maj. Gen. Robert V. Lee on 30 September. The President also nominated Brig. Gen. Julian A. Wilson, USAREUR AG, for two stars as Deputy Adjutant General, a post now held by Maj. Gen. Bruce Easley. General Lambert, 52, unlike his recent predecessors, will not need to retire for age upon completion of a 4-year tour as AG.

MAJ. GEN. WEBSTER ANDERSON, Executive Director of the Army Clothing and Textile Materiel Center in Philadelphia, will become Quartermaster General in June. He will replace Maj. Gen. Andrew T. McNamara, who will hold three-star rank as Deputy CG of the Eighth Army in Korea. General Anderson was the senior QM officer among those considered for the top job.

THE WALTER REED Army Institute of Research in Washington, D. C., will get a new Director this summer. He is Col. Conn L. Milburn, jr., Executive Officer of the Walter Reed General Hospital. He will succeed retiring Col. R. P. Mason. New Deputy Director for WRAIR will be Lt. Col. W. H. Meroney, III, who commands the Army Tropical Research Medical Laboratory in Puerto Rico.

THE AIR STAFF IS CATCHING UP with nominations made by the AF Medical Service for promotion to brigadier general. *The Journal* reported on 25 February, in connection with a list of Presidential nominations for AF general officer promotions, that AF Surgeon General Oliver K. Niess has proposed advancement of 3 officers to one-star rank. They were Colonels John R. McGraw, SAC Surgeon, and Don S. Wenger and Larry Smith, both of General Niess' office. Colonel McGraw and one officer not on General Niess' list, Col. Charles H. Roadman, NASA Director of Aeronautical Space Medicine, were named by the Air Force board and approved by President Kennedy. Now, the Chief Executive has designated Colonel Wenger, Chief Professional Consultant to General Niess, for one-star rank. There is speculation that an early promotion will be forthcoming for Colonel Smith.

CNO Burke Reports To Congress On Soviet Navy Ship And Air

From first page—
near future."

Admiral Burke said the Soviet Navy Air Force "is equipped with modern aircraft, well trained personnel, and up-to-date equipment. It is only logical to presume that appropriate aircraft will be equipped with air-to-surface missiles."

His presentation to the Senate Committee noted that the Chinese Communist Navy "is the largest wholly Asian naval force in the Far East. There is a significant submarine force and a well developed naval air arm. The Chinese Communist naval capabilities, Admiral Burke said, "are primarily defensive, but the navy does have a limited offensive capability."

The Soviet submarine expansion program reached a peak in 1956, with a decline since then in overall numbers by scrapping or retiring older boats. Admiral Burke said: "There may be a further slight decline in total numbers if the Soviets accelerate the retirement of older units," but added that despite the reduction "the total power of the Soviet submarine force is increasing."

"The Soviets now have in operation a number of submarines believed to be capable of launching ballistic missiles, although as far as is known, none of these are nuclear powered."

Admiral Burke made a strong point of the expansion in the Soviet Merchant Marine, which now has about 900 ships over 1000 tons, totalling about 3.5 million gross tons. This is double the 1946 strength, and the CNO forecasts that by the end of 1965 "it is expected that the Merchant Marine will double that at the end of 1958, both in numbers and tonnage."

The Soviet fishing fleet, said Admiral Burke, is "the largest most modern in the world," and has "expanded its activity to areas formerly utilized principally by western fishermen."

Noting that the U.S. has about 50 ships engaged in oceanography, including both naval and private types, Admiral Burke said that the Soviet Academy of Sciences has about 85 ships engaged in this effort, covering the Atlantic and Pacific Ocean areas as well as the other major seas of the world."

The Senate Committee learned from Admiral Burke that "morale in the Soviet Navy is considered high. The Soviet Navy prides itself in having the world's largest submarine, mine-laying, minesweeping,

and torpedo boat fleets. The patriotism of Soviet naval personnel is continuously nurtured by political as well as military leaders."

"Preferential pay, housing and other considerations help maintain high morale."

Admiral Burke said that the tempo of Soviet Naval training at sea "has in-

creased in recent years. As a result of high morale, improved training and technical advancements in the Navy, the overall equipment capability and operating efficiency of Soviet naval forces is estimated to be quite high."

This assessment of "how the Soviets might use their naval assets under varying conditions," was presented by CNO

Burke to the Senators:

"The Soviet strategic concept assumes prudent preparation for any contingency and the use of all effective strengths. This was stressed again in January, 1960, when Defense Minister Malinovsky stated:

"... since successful conduct of military actions in a modern war

Chance Vought
bridges
the history
and future
of Naval Aviation

nd Air Growth; Communist Global Sea Strategy Is Assessed

is possible only on the basis of combining the efforts of all types of the armed forces, we are retaining at a definite strength and in relevant, sound proportions all types of our armed forces . . .

"Although the Soviets are deterred from deliberate initiation of general war, they nevertheless realize that the

nature of their objective courts this risk. Regardless of how general war might possibly start, the Soviet Navy would be heavily involved. Undoubtedly, Soviet missile armed submarines would participate in the initial phase of nuclear war. The future addition of nuclear powered ballistic missile submarines to the Soviet Navy will enhance

this naval capability.

"In any prolonged combat phase following a nuclear exchange in a general war, the bulk of the Soviet submarine force would attempt to cut allied sea lines of communication, primarily the approaches to Western Europe. The objective would be to keep the United States from transporting its follow-up

military and industrial potential to Eurasia. But in addition, the Soviets would be intent also on cutting the U. S. off from critical sources of supply. They know we are a maritime nation and that our alliances are maritime alliances. They would consequently attempt to disrupt those alliances in order to isolate us.

VE-9 (1921)

O2U-1 (1926)

SB2U-1 (1935)

F4U (1940)

Regulus (1960)

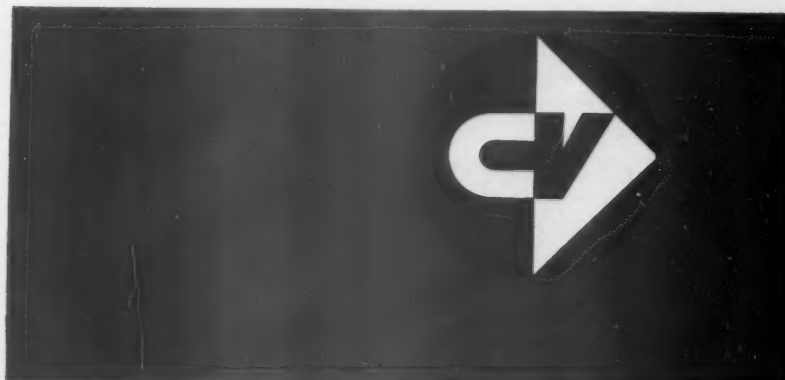

F4U-19V (1960)

For 40 consecutive years, the Navy and Chance Vought together have strengthened national defense and hastened aviation progress. In 1923, VE-9s went aboard the Navy's first commissioned aircraft carrier, the USS Langley, to prove that air power could go to sea. In the O2U-1 Corsair, received in 1926, Navy pilots captured four world's performance records. Pilots of the F4U Corsair fighter registered an 11-to-1 kill ratio during World War II, and the Corsair remained in production 11 years—longer than any U. S. fighter before or since. In 1953, the Regulus attack missile presaged a mighty deterrent with its first successful launch from a submarine. In 1957, carrier striking speed shot past 1,000-mph with delivery on the F8U Crusader. Today, Navy and Marine Corps fliers maintain the Free World's border-watch in more than 700 Crusaders. Tomorrow? Wherever the next big challenge lies—in manned space flight, or in further mastery of the atmosphere—Chance Vought is equipped to help add more great hours to the history of Naval Aviation.

CHANCE VOUGHT CORPORATION

"It can be expected that the Soviet naval surface forces will be primarily defensive, to deny us use of the seas in the Eurasian area and to help secure control of the Eurasian land-mass.

"In anti-submarine warfare, the Soviets would be concerned with disrupting our submarine activities including those of the POLARIS system. We can expect to see new antisubmarine ships and aircraft, and improvements in capability.

"Each limited war situation is governed by its own circumstances and special objectives. The Soviet role in limited war situations has so far been that of sponsor, instigator and supporter. Soviet logistic support for aggression by proxy is well known. The precise nature of future outbreaks of limited war, in which Free World territory is at stake, is difficult to predict.

"The term Cold War by definition implies that a nation or group of nations will attempt to secure advantages or expand its power without triggering military retaliation. At the same time, a condition of Cold War implies military strength and this strength is used as psychological pressure. This psychological pressure can instill fear, or grudging admiration, and can build up or break down prestige.

"The increasing pattern of Soviet use of the oceans during the Cold War reaps immediate benefits in trade, penetration and prestige. It also means that the Soviets are developing a sure touch in the very medium they will have to use to isolate and destroy the Free World maritime alliance in the event of general war. They are training in Cold War on one of the critical battlefields of limited and general war.

"Their strategic concept is versatile and flexible. It calls for constant readiness of land, sea and air forces for a variety of contingencies. These range from the threat of the use of force all the way up to and including general war."

Warrant Promotion Board Will Meet

A selection board will be convened 20 June to recommend Regular Army warrant officers for permanent promotion to W-4 and W-3.

Zones of consideration for promotions are as follows: W-4, 365 through 547 and W-3, 2502 through 2586 in the 1961 edition of the Army Register.

Selections will be made by the "best qualified" method.

The Army said: "Any warrant officer eligible for consideration may forward a written communication, through channels, to The Adjutant General, ATTN: Department of the Army Selection Board, Department of the Army, Washington 25, D.C., inviting attention to any matter of record in the Headquarters, Department of the Army, concerning himself which he deems important in the consideration of his case, provided such communication is forwarded not later than 10 days after convening of the selection board and it does not contain any reflection upon the character, conduct, or motives of, or criticism of any officer."

Military Families Get "VIP" Auto Tags

"VIP" automobile license tags in
Washington, D. C., this year have
been assigned to 44 active and retired
military officers—28 Army, 11 Navy and
5 Air Force.

Included in the list of those with the
coveted low-tag numbers are General
Lyman L. Lemnitzer, USA, Chairman of
the Joint Chief of Staff (number "44"),
and his two predecessors, General
Omar Bradley, USA (number "179"),
and Admiral Arthur W. Radford, USN-
Ret. (number "602").

"Best" numbers on the list are those
in the under-100 group, like General
Lemnitzer's, those with the same num-
ber repeated, like Vice President Lyndon
Johnson's "111," and those with the
same number first and last like Mrs.
John F. Kennedy's "626."

Lowest number assigned to a member
of the Armed Forces is "3," which al-
ways goes to the Army Engineer officer
who serves as District Commissioner—
this year, Brig. Gen. Frederick J. Clarke.

Former D. C. Commissioner's also
have low tag numbers. Maj. Gen. Louis
W. Prentiss, USA-Ret., has two low-
numbered tags: "22" and "485." Maj.
Gen. S. D. Sturgis, USA-Ret., has num-
ber "120."

Here is the list of low-tag holders
among the military:

3—B/G Frederick J. Clarke, USA
22—M/G Louis W. Prentiss, USA-Ret
44—General Lyman L. Lemnitzer, USA
106—Lt. Gen. R. A. Wheeler, USA-Ret
120—Maj. Gen. S. D. Sturgis, USA-Ret

SERVICE FAMILY NOTES

Family Editor
Louise B. McGiffert

Associate Family Editor
Bertie Johnson

Barbara Fran Sundberg, Goucher College senior, has been awarded a Fulbright grant to study International Relations at the University of Oslo, Norway. She is the daughter of Lt. Col. and Mrs. Edward B. Sundberg of Farwell Road, Tyngsboro, Mass. He is with the Electronic Systems Division of the AF Systems Command at L. G. Hanscom Field, Bedford, Mass.

Mrs. Anne Bayha, 124 Vicki Lane in San Antonio, widow of a former Kelly AFB, Tex., Chaplain, has authored a novel about young adults entitled "Song of the Weeping Willow." Mrs. Bayha began writing the book several years ago, but set it aside. She again worked on the manuscript while her husband, Chaplain (Capt.) Charles D. Bayha, was assigned to the USAF Security Service chapel at Kelly AFB, Tex., 1957-59. The book was interrupted again when Chaplain Bayha was ordered to Okinawa. Although the chaplain drowned accidentally, and Mrs. Bayha's third child, six-month-old son Christopher, was born in the islands, the authoress finished her book.

Martha Claire Tait, daughter of Col. and Mrs. Albert Lewis Tait, 9315 West Parkhill Drive, Bethesda 14, Md., a student at the University of Oklahoma, has been awarded a Woodrow Wilson National Fellowship for graduate study in the academic year 1961-62.

Lois Dorais Potter is among the winners of the 24 annual Marshall Scholarships granted by the British Government to American students for 1961. She is the daughter of Lt. Col. (USA) G. V. Potter and Mrs. Potter of Brooke Army Hospital, Fort Sam Houston, Tex.

Miss Potter, who is majoring in English at Bryn Mawr, will attend Girton College, Cambridge, England, beginning next September. She holds the Scholarship for a period of two years and during that time will read for a B.A. or M. Litt.

Society Of Sponsors Provide Scholarships

The Society of Sponsors of the U. S. Navy awards annually to sons of deceased retired Navy and Marine Corps personnel one or more scholarships for one academic year to preparatory schools for the U. S. Naval Academy. Applications for such scholarships should be made to the Chairman of the Scholarship and Welfare Committee, Mrs. George R. Weaver, 3709 N. Woodstock, Arlington, Va.

Mrs. Kreuz Is Guest

The Naval Medical Service Corps Wives Club met at the National Naval Medical Center, Bethesda, Md., 20 April where the guest of honor was Mrs. Frank P. Kreuz, wife of Rear Admiral Kreuz, Commanding Officer of the Medical Center.

"Hostess of The Month" was Mrs. Heyward E. Hall, assisted by Mesdames Erwin White, Lawrence Isert, Robert L'Italien, Edward Murphy, Langston Richardson, and Cecil Toole.

MFSS Wives Recall Past

Brig. Gen. James L. Snyder, Commandant of the Medical Field Service School, Ft. Sam Houston, Tex., spoke at the MFSS Women's Club 10th anniversary luncheon 12 April.

Guests included the honorary and past presidents who still reside in San Antonio. Honorary Presidents were: Mesdames William E. Shambora, Joseph I. Martin, Elbert DeCoursey, John F. Bohlander and James L. Snyder. Past Presidents were Mesdames Guy C. Hill, George L. Hahn, John D. Flintier (who is now serving her second term), Walter Spearman and Mario E. Smith.

Mrs. Guy C. Hill, the first President, gave a brief history of the club which was founded in 1951.

Dinner Honors VAdm. Raborn; "Surprise" Guests Are Polaris Chief's Parents

(Photo, Page 26)

FIFTEEN-HUNDRED air miles separate San Antonio and the East Coast, but when an 86-year-old Texas couple received an invitation to a testimonial dinner in Paterson, N. J., the distance seemed like nothing.

The man who was to be honor-guest was someone whom the couple greatly admire and love—their son, VAdm. William F. Raborn, Jr., boss of the Polaris program.

The elder Raborns (even though she was in a wheelchair as the result of a recent accident) wouldn't have missed the dinner for all the oil in Texas. They were so eager to reach New Jersey that the senior Mrs. Raborn thought their 600-mph jet flight was "a might slow."

Together with other members of the family, the Admiral's parents were "surprise" guests when the Paterson Citizens Committee for Recognition of Outstanding Achievement honored the Polaris chief on 14 April.

Top leaders of industry paid tribute to Admiral Raborn, who heard Yale Professor Oskar Morgenstern call the fleet ballistic missile "the most successful single weapon system this country has produced."

Professor Morgenstern, author of "The Question of National Defense," said the Polaris project "should be imitated and duplicated" in other military weapons programs.

Paterson publisher Harry B. Haines, the Committee Chairman, welcomed guests at the dinner and introduced John Charles Daly who served as Master of Ceremonies.

In rapid-fire order, Admiral Raborn received the key to the city from Mayor Frank X. Graves, Jr.; the "log" of the

USS Hancock (on which he served as executive officer during WWII) from Father James J. Doyle, former Hancock Chaplain; one of the first "missiles," an Indian arrowhead, from Mr. Donald W. Smith, President of General Precision Corporation; a copy of Jules Verne's "Twenty Thousand Leagues Under the Sea," from Mr. I. Nevin Palley, President of IIT-Federal Laboratories, Nutley, N. J.; a model of the first submarine ("Holland I") from T. Roland Berner, Chairman and President of Curtiss-Wright Corporation; and a compilation of the "Holland" papers from Mr. Haines.

In presenting the Admiral the scale Model of the submarine "Holland," Mr. Berner praised the chief of the FBM program for the outstanding ability with which he has provided leadership and inspiration for the Polaris team. Mr. Berner said the Polaris is a "persuasive argument for world peace."

Admiral Raborn, visibly touched by the surprise appearance of his family, responded to the tribute by lauding the Naval-industrial teamwork which produced the Polaris. He remarked that he tells his team members "not to spend too much time standing in front of a mirror admiring yourselves, we have got work to do." He promised that the Navy will be producing one FBM submarine a month by 1963.

In addition to his parents, other members of Admiral Raborn's family who were present for the dinner included his wife, the former Mildred Terrill, and his sisters, Mrs. W. A. Miller of San Antonio and Mrs. Nicholas Mylenki of Wyckoff, N. J., as well as Mr. Mylenki and several nieces and nephews. Mrs. Raborn is a Commander, USN Nurse Corps, retired.

Mrs. Booth Honored At Ft. Sam Houston

THE Fourth Army Woman's Club at Ft. Sam Houston, Tex., honored Mrs. Donald Booth, wife of Lieutenant General Booth, new CG, at the April luncheon. Also honored was Mrs. Lewis S. Griffing, wife of Major General Griffing, Fourth Army's Deputy CG, who recently departed for Fort Sill, Okla. Left to right are: Mrs. George R. Mather, wife of Major General Mather, Fourth Army CofS; Mrs. Booth; Mrs. Peter Pearson, wife of Colonel Pearson, G-1 Section, Fourth Army, and Mrs. Griffing.

Service Weddings and Engagements

MISS Helen Stewart Seitz, daughter of Maj. Gen. John F. R. Seitz, USA, of Governors Island, N. Y., and the late Mrs. Helen Hardenbergh Seitz, became the bride of Mr. R. King Patterson, 15 April in an afternoon ceremony at the Star-of-the-Sea Chapel, Governors Island. The bridegroom is the son of Mr. and Mrs. Robert H. Patterson of Grosse Pointe, Mich.

Attended by Mrs. R. Michael Black as matron of honor, and Mrs. Reese H. Harris, III, Mrs. Stewart Y. Fish, Misses Harriet Hand and Annette Granstrom as bridesmaids, the bride was given in marriage by her father. Mr. W. Scott Roberts served as best man, and ushers included Messrs. J. F. R. Seitz, Jr., Raymond G. Seitz, brothers of the bride, T. J. Cogswell, H. M. Drake, H. L. Franc, III, and A. T. Waterfall, II.

Mrs. Patterson, granddaughter of the late Col. (USA-Ret) and Mrs. Raymond W. Hardenbergh, and of Mrs. George H. Seitz of Wilmington, Del., and the late Mr. Seitz, is an alumnus of the Emma Willard School and Wheaton College. Her bridegroom, a graduate of Culver Military Academy and Brown University, where he was a member of the Phi Gamma Delta fraternity, is now associated with the Cleveland advertising firm of Lang, Fisher & Stashower, Inc.

GRATIEN-SURRATT—Col. (USA) and Mrs. Joe Free Surratt of Qtrs. 3, Ft. Sheridan, Ill., announce the marriage of his daughter, Stephanie, to Mr. Wayne Norbert Gratien, son of Mr. and Mrs. Norbert M. Gratien of Clay, N. Y., in a double ring ceremony at the Post Chapel, Ft. Sheridan, 8 April.

The bride was attended by Mrs. Paul J. Burns as matron of honor, Mr. Joe F. Surratt, Jr., served as best man, and Mr. Burns ushered.

Mrs. Gratien and her bridegroom are now students at Hillsdale College in Michigan, where he is a member of the Delta Sigma Phi fraternity.

GANS-WILLIAMS—Mr. and Mrs. Bert Goddard of Lebanon, Ohio, have announced the engagement of their daughter, Miss Dolores Williams, to Chaplain Arthur E. Gans, 1st Lt., ChC, son of the Reverend and Mrs. Herbert C. Gans of Petaluma, Calif.

Miss Williams, a graduate of the Maryland Institute of Art, Baltimore, has been employed for some time at Ft.

Meade, Md., as an illustrator in the Intelligence, Plans, Training & Operations Section, where she has received three "superior" awards and a number of commendation letters from former Second Army and Post commanders and staff officers. Chaplain Gans, a graduate of Westown School in Pennsylvania, attended Oberlin College and is a graduate of the University of Washington, and the Church Divinity School of the Pacific. He was made a deacon in the Episcopal Church in June 1960 and was ordained a priest at Grace Episcopal Church, San Francisco last January, after which, he reported to duty at Ft. Meade.

The wedding is planned for 25 June and will be performed by Chaplain Gans' father at the Post Chapel, Ft. Meade.

LAMB-SAAR—Col. (USA) and Mrs. Otto T. Saar of 147 Grierson Ave., Ft. Huachuca, Ariz., have announced the engagement of their daughter, Elsie Ann, to Mr. Paul Arthur Lamb, son of Mr. and Mrs. Robert A. Lamb of Tucson, Ariz.

Miss Saar, whose father is Chief of Staff at the Army Electronic Proving Ground, is a graduate of Richmond Academy, Augusta, Ga. She attended the University of Maryland's Munich, Germany branch and the University of Arizona's College of Engineering. Her fiancé, who obtained B.S. and Electrical Engineering degrees from the latter University, also attended the New Mexico College of A&M Arts. He is employed at the Electronic Warfare Department at the Proving Ground.

A September wedding is planned.

WITHERS-LATIMER—Mr. and Mrs. John Paul Bracken of Paoli, Pa., announce the engagement of her daughter, Miss Sarah Marshall Latimer, to Lt. William Zalesky Withers, USN, son of Mrs. George Kenyon Withers of 1568 Boulevard Lorraine, S. W., Atlanta, Ga., and the late Colonel Withers, USA.

Miss Latimer, daughter of the late Maj. William J. Latimer, USA, is a graduate of the Agnes Irwin School, Philadelphia. Her fiancé, USNA '58, attended Georgia Military Academy. He is now assigned to the Nuclear Power Training Unit at Arco, Idaho. Lieutenant Withers is the grandson of Mrs. William J. Zalesky of LaJolla, Calif., and the late Captain Zalesky, MC, USN.

Mrs. Gratien

Miss Saar

KELLENBERGER-JENNA—Col. (USA) and Mrs. Russell Walker Jenna of Seoul, Korea, announce the engagement of their daughter, Steva Peyton, to 1st Lt. William Estes Kellenberger, USA, son of Mr. and Mrs. Norwood Elbridge Kellenberger of Danvers, Mass.

Miss Jenna, granddaughter of Col. (USA-Ret.) and Mrs. John Stephen Sullivan of Washington, D. C., attended Mary Washington College of the University of Virginia at Fredericksburg. Her fiancé is a graduate of Norwich University and is currently serving with the 11th Engineer Battalion in Korea.

Miss Jenna

MOORE-TERRY—Col. (USA) and Mrs. Augustus T. Terry, jr., of Ft. Leavenworth, Kans., announce the engagement of their daughter, Susan Elizabeth, to Lt. Donald William Moore, USA, son of Mr. and Mrs. Merle T. Moore of Spokane, Wash.

Photo by D. Barta
Miss Terry

Miss Terry attended Louisiana State University. Her fiancé, a graduate of the University of Washington and a member of the Phi Theta Pi fraternity, is currently stationed at Ft. Sill, Okla., with the Field Artillery Missile Systems Evaluation Group.

The wedding is planned for 5 May at St. Ignatius Chapel, Ft. Leavenworth.

GILLESPIE-TYNES—Brig. Gen. (MC, USA) and Mrs. Achilles Lacy Tynes of Qtrs. 320, Tripler AH, Honolulu, Hawaii, announce the engagement of their daughter, Margaret Finley, to Lt. Richard Hyde Gillespie, USA, son of Col. (USA) and Mrs. Kenneth Gillespie of Ft. Mason, Calif.

Miss Tynes

Miss Tynes, whose father commands Tripler Army Hospital, attended Penn Hall in Pennsylvania, and now a student at the University of Hawaii. Her fiancé, USMA '60, is currently stationed at Schofield Barracks, Hawaii, with the 65th Engineer Battalion.

THE ARMY AND NAVY LEGION OF VALOR

solicits inquiries leading to membership from those who hold the Medal of Honor-Distinguished Service Cross or Navy Cross. We are to hold our 71st annual reunion this year in beautiful Miami Beach at Hotel Barcelona August 14-15-16. This is a wonderful organization which you will enjoy belonging to. Write Capt. G. T. Fleet, 331 Rosemary St., San Antonio, Texas.

Secretary Connally Tells Navy And Marine Corps Officers What He Expects

From page 11—

remains dedicated, honest, honorable, and respected.

The fitness report system is time-tested and adequate. I urge you to set high standards of honor, integrity, and achievement and to be ruthless and positive in reporting on the fitness of anyone who does not meet these standards. I would remind you that when you do not report poor performance on the part of a subordinate, you are downgrading the entire officer corps and yourself.

RESPONSIBILITY AS SPOKESMEN

Do not forget that you are an officer 24 hours a day. The authority of special trust and confidence with which the President of the United States commissioned you cannot be put aside for purposes of convenience or personal expediency.

With or without your uniform, despite any official disclaimer and regardless of the enticement of anonymity, you are in matters of defense and national policy a Navy or Marine Corps spokesman. As such, you inherit a responsibility which I hope none of you wish to avoid. With reference to your fulfillment of this responsibility, I ask your help and cooperation.

The Navy's top civilian and military leaders cannot effectively fight for the kind of Navy we all want if they must be forever explaining away or defending some counter-policy utterance made by a well-intentioned but misguided and, in the end, irresponsible officer who hides his action behind anonymity.

I have a simple rule of thumb by which I hope you will all govern your actions: Recognize and accept your own responsibility by insisting upon being quoted by name, rank, and billet. Your responsibility will then be fulfilled much the same as when signing the log for your watch. In short, if you are not willing to be quoted by name, you should not be speaking.

LEADERSHIP

This brings me to General Order Number 21 on Naval Leadership. This General Order was not intended as a panacea for leadership deficiencies. It must be used as a guide—as a constant reminder that we must concern ourselves every moment of every day with leadership.

No one could possibly set down in writing all of those many facets of individual judgment and character that go into the make-up of a good leader. Leadership is not something that you can compute by modern scientific methods. It is something that you and I must feel—must be aware of and must practice—sometimes without any guidance whatsoever.

In your own areas of responsibility, I charge you with providing careful guidance and firm leadership for your portion of our Navy.

NEED FOR INFORMED NAVY AND MARINE CORPS

Our men must be uppermost in our minds. But we are responsible for more than just physical well-being; we are responsible for keeping our men informed of our country's goals, history, and heritage, in addition to our naval operations, tasks, and missions.

Some weeks ago, we started distribution of films of the President's press conferences. This was done so that all of our officers and men aboard ships could also see and hear what the President of the United States had to say, his statements, his reactions to questions, his philosophy, and his attitudes.

We cannot expect our men and women to be motivated without a basic knowledge of the need of the contribution they are making. They must be informed to the point of realization that their service is not the traditional peace time service. We are obligated in these days of cold war to let them know the depth and breadth of the contribution they are making to our country and the peace of the world.

I want our men to know this. I want us to have, as we must, the best informed Navy in history.

RECOGNITION

In the cold war, the junior officer or petty officer who gives his job more than is required, and in the process makes an important and lasting contribution, is entitled to recognition more tangible and less private than that made possible by use of the fitness report.

In order to stimulate and encourage the pursuit of excellence and improvement in the less glamorous fields of operations, administration and management, I intend to

establish an award system for recognizing junior officers, lieutenant commanders and majors and below, who excel or make major contributions.

Additionally, I will institute some new form of recognition of outstanding leadership examples among petty officers and non-commissioned officers at the ship and company level.

SPECIALIZATION

The increasing complexity of our Navy requires increasing specialization. We must look into the possibility of slowing down the rotation in order to guard against transferring our officers and men at about the time they become really proficient in a particular job. We cannot afford rotation merely for the sake of career pattern.

In today's Navy the demands of the various tasks are so different and so taxing that no one officer or man can hope to become even moderately proficient in all. The requirements of operations at sea, of international relations, of logistics, and other aspects of the Navy Department's mission are equally demanding and require the same attention to continuity of assignment.

In naval career planning the needs of the Navy must come first and the contribution of an officer or enlisted man to the fulfillment of the Navy's mission must be given greatest weight in considering his recognition and promotion.

PERFORMANCE

Several questions occur to me in connection with the foregoing.

Could we not make changes in our selection and detailing systems to permit earlier determination of an officer's ability to command, possibly at the level of commander or very junior captain, and thereafter be able to use officers in billets of great importance for longer periods of time?

In an age of technology, should we not place more emphasis on engineering duty officers? Should we not take steps to even further increase the vitality of this group—particularly in the junior ranks? And should we not have greater communication between the line officers and the technical officers? Should there not be more line officers in the Bureaus and more technical officers in the offices that deal with requirements and planning?

Why can we not set up a system which will clearly fix responsibility for design, procurement and production within our Bureaus and keep personnel in specific programs long enough for them to achieve credit or bear the blame for their work and decisions?

You can be sure that there will be included in the instructions that I give to Selection Boards the criteria that officers should be selected and promoted based not on their ability to keep their finger on their number, but on the past and present demonstration of the initiative and courage to make their greatest contribution to their service and country consistent with their respective abilities.

COMPETENCE

Never have our needs for competent men been greater.

Let us have men with the vision to say, "This item, this system offers an inadequate return for its cost and for the efforts we must put into it. It is neither urgent nor obvious."

Let us have men who know the wisdom of savings—savings of men, dollars and materials—so that we can build and man more ships and aircraft—so that we can improve the quantity, the utility and the quality of our weapons to better preserve freedom. I say to all of you—the officer or enlisted man who by his own industry and while making positive contributions saves enough money to pay his own salary has truly served his country well.

Let us have men with judgment to say of our forces and our tools: "This is their true potential. This is their potential for keeping the peace and falling peace, this is their potential for winning wars."

If there were time, if there were money, if there were anything less than a total threat we could condone a few people doing somewhat less than their best. We could condone a few people preoccupied with the hatching the nest egg of retirement. That we cannot condone these things is now beyond our own choosing.

OFFICER TRAINING

In our officer training of these times: Should there not be more emphasis on international affairs and National motivations, including the actions and reactions of Nations to the ebb and flow of world

events?

Should not everyone of our officers speak at least one foreign language?

Should not we better stress the economics of government? Do we train our officers to view our needs in the light of our overall economy and to try to evaluate a naval requirement in terms of our nation's overall ability to provide and sustain it?

Should we not, in the light of the rapid technological changes, provide better means for our officers to stay on top of their areas of special knowledge through intensive periodic courses of short duration in our own service schools or in universities throughout the country?

SHIPBUILDING & MODERNIZATION

I am particularly interested in the modernization of the Fleet, which leads directly to our shipbuilding and aircraft procurement programs. It is obvious that we cannot go on hoping that someone is going to wave a magic fiscal wand to modernize our aging Fleet.

If we continue to build ships that last 20 years at the rate of 20 or so a year as we have been in the past, we can see the day when we will have a Navy of half the number of ships we have now. This must not be. We must find ways to build ships more cheaply, while at the same time expressing our needs more clearly.

Perhaps the answer lies in less sophisticated ships—or more ships of exactly similar design. I am not at all convinced we have to hand tailor every ship that comes off the ways. We cannot hope to embody in each ship and aircraft all of the improvements that our technical laboratories can dream up. If we did so, a ship would never go to sea, because our technical progress is never-ending.

Too many of our modern ships have cost too much, have been late in delivery, and are severely restricted in performing their missions because of the premature incorporation of hoped-for advances in technology and frequent changes made to their specifications.

In that connection we must not become subservient to commercial vendors, no matter how well intentioned, who give us proposals for things that fit neither our needs nor our pocketbook.

We must be ruthless in eliminating projects of dubious value. We cannot use our active shipbuilding and aircraft purchase programs to carry long range research and development programs. We must consider the cost of sophistication and its impact on reliability and the numbers of individual ships and aircraft we are able to buy. We must realize when we are pushing the state of the art.

We need to take a close, hard look at the fiscal and technological facts of life and figure out just what we do need—be sure we are right—and then pursue our goals with vigor and good judgment.

Our proposed 1962 shipbuilding program represents a significant increase over the post-Korea program. We must do even better, particularly over the next seven or eight years, to make a significant improvement in the existing state of overage and obsolescence in our Fleet.

AIRCRAFT PROCUREMENT

In the same vein, I am interested in reversing the trend of a declining and aging inventory of aircraft by at least procuring aircraft in excess of anticipated losses. Our aircraft development plans and our aircraft shopping lists need similar searching examinations.

How much high speed and sophistication do we need? Do we need numbers of medium cost close support aircraft or fewer multi-million dollar close support aircraft?

Here again, we need to project our plans carefully as far into the future as possible and then go all-out to stop the trend where sophistication is pricing us out of business.

SURFACE WEAPONS

We need to examine surface weapons in the light of our future roles and missions. Should we re-emphasize our amphibious and limited war capabilities and the kinds of surface weapons which best support them, even at the expense of our ability to press carrier borne air attack against strategic targets? As strategic missiles come in, does anything else go out?

What is the surface-to-surface weapon of the future? against other ships? and for shore bombardment?

Is it Talos and possibly Terrier? Or do we need something as long range and powerful as Polaris?

Or will we need five inch and cruiser main battery guns for the foreseeable future?

How badly do we need Typhon as a replacement for Talos, Terrier, and Tartar? Can we afford it?

ANTI-SUBMARINE WARFARE

There is no doubt in my mind that the potential enemy submarine threat is one of the most serious we face. If not countered it could permit an enemy before many more years to be able to use the missile-carrying submarine to destroy our cities. With uncontrolled conventional and nuclear-powered submarines he could destroy any seaborne effort we might make during or after an initial attack.

It is therefore vital that we maintain control of these two variations of the submarine threat.

To do so, what greater emphasis can we place on our ASW effort? What proportion of our effort must we place on surveillance systems? What better use can we make of our present equipment? Can we find cheaper ways of obtaining the same promising results we are now getting from our newer but heavy and very expensive equipment?

All of these problems have been carefully studied by our present ASW organization from the ASW Committee on down—but sometimes fresh, young brains come up with something new, simple, and unapparent.

This is a fertile field—and one where the pay-off means much to our nation's safety.

ADVANCED FLEET ANTI-AIR WARFARE CONCEPTS

Should we press ahead for the EAGLE-MISSILEER air superiority weapons system? If we are unsuccessful, what alternate means do we have for defending against low-flying snoopers and large scale, low-level attack? Against guided missiles?

If we feel that this concept is vital to our future ability to control the air over our Fleet and over areas of amphibious operations, how can we best present this necessity to the Administration and to the Congress?

NUCLEAR PROPULSION

We have for several years come to accept nuclear propulsion in submarines as normal rather than unusual. We are well along in developing tactics to use its great advantages and to overcome its few weaknesses.

The era of nuclear propulsion in surface ships is almost here. What plans can we make to exploit its many advantages before rather than after we have it? If we know what we plan to do with it, perhaps we can then more wisely decide how much of our money we want to put into building more nuclear-powered surface ships.

We can, of course, put together a nuclear-powered task force built around the ENTERPRISE, LONG BEACH, and BAINBRIDGE. But is this the best use we can make of this high-speed, virtually unlimited mobility?

A single ship—representing a substantial segment of sea power—will be able to range over 750 miles a day anywhere. In the era of multiple trouble spots and limited wars, would not two nuclear-powered frigates be worth three ships that are tied to oilers and preoccupied with fuel conservation? We need to think big and well into the future. Past experience is a good base, but it should not limit us.

ORGANIZATION

In your devotion to your job I have noticed that some of you sometimes lose sight of the problems and capabilities of other elements of the Navy. For this reason I feel it is important that no artificial organizational barriers exist to promote this compartmentation. Therefore, I intend to take a close look at previous Board reports and when justified, make organizational changes. For instance:

Do we need an Aircraft and Missile Characteristics Board to parallel the action of the Ships' Characteristics Board? Or should we abolish the Ships' Characteristics Board and go about both problems entirely differently?

Should we put greater emphasis on test and evaluation by creating a board to specifically advise the Chief of Naval Operations and myself when a system will be ready to be placed in a ship or aircraft?

Why should not the Inspector General have authority within the Military Sea Transportation Service and within the material Bureaus?

QUESTIONS

During the next several months I intend

to pose the responsible officers a number of questions. Many of these I have touched on already. In asking these questions you can be assured that my motivation is not criticism, but rather an honest desire to make sure that we do not overlook any avenue than may promise greater progress in fulfilling our missions.

These examinations—the answers to these questions—may often reveal we are doing the best we can. But in responding to these questions, if there is, through your own abilities, opened up but one more avenue for progress, I shall feel that my work has not been in vain. Likewise, if we can block off even one thing that is sapping our strength and effectiveness, we shall have done something worthwhile.

I want you to thoroughly understand that I have no pre-conceived answers to these questions. I also know that a previous study can undoubtedly be produced concerning any one of them. It very well may be that there are no logical answers to some of them. The answers to others may indicate major changes are in order.

EXAMPLES OF QUESTIONS

Here are a few more questions that have occurred to me since assuming my present duties.

In this day and age, with our tempo of vitality—necessary operations so high, are we dissipating the dedication and interest of our junior personnel by spending too much time in exercises, training higher echelons of command—exercises at least in part necessitated by the rapid turnover of senior officers?

Would an objective evaluation show that we are spending too much on basic research and not enough money on test and evaluation and that we are inventing more than the Navy and industry can intelligently use? Or is the case just the opposite?

Does any other area in the Navy in addition to Polaris lend itself to the creation of a Special Projects Office?

Our Bureau Chiefs administer complex organizations handling billions of dollars annually. What more can we do to help them in these heavy responsibilities?

Why should not senior officers involved with the design and procurement of ships and aircraft bear the same responsibility and suffer the same penalty as a ship commander who carelessly allows his ship to be damaged.

Why is our first re-enlistment rate not higher? Have we explored all avenues to attract good men and to persuade them to re-enlist?

Are we on the right tract in recruiting and re-enlistment programs? I have here in my hand a series of pamphlets used in recruiting. These pamphlets are replete with promises of schooling, privileges and good liberty. They seem to infer that the thinking man starts to aim toward retirement before he is old enough to vote. Let me make it clear that I am in favor of every bit of schooling we can give a man. I am in favor of privileges so long as they are firmly meshed with responsibility. I am in favor of good liberty and well-earned retirement benefits. But would it not be better to offer our prospective recruits unlimited opportunity to serve his country, to compete with the best of the nation's youth for promotion in a forward-looking, fast-moving organization, opportunity to aid in protecting the security not only of our own country, but of the entire free world?

In my first months in this position I have found that when questions come to me in the form of letters, in which the writer makes suggestions for improvement or change in the Services, that the first action by the person given the responsibility of preparing a reply is usually defensive. The proposed answer tends to justify past action and present method rather than to inquire into the matter to see if the proposal really has any merit. How can we become more open-minded and less defensive in our actions?

Are we paying enough attention to physical fitness?

Why is the regular NROTC retention rate so low? Is our selection system wrong? How can we select better motivated candidates? Should we not lengthen obligated service to six or ten years to assure that we get career motivated people in our NROTC program?

Throughout history petty officers and non-commissioned officers have provided technical knowledge and tenure in the Navy and Marine Corps. Have we continued to recognize the value of these people and to place sufficient responsibility on them?

And now the most complex question of all—what additional and continuing steps can we take to ensure that we ever keep our shore establishment trimmed and pointed to the Fleet? How can we make sure that every man and woman who serves—military or civilian—remains forever mindful that the Naval Establishment exists purely and solely to send to sea a fighting Fleet? How can we make sure we all understand that an hour of labor or a pound of supplies wasted ashore may be the price

of the seagoing fleet without which we jeopardize our freedom?

ANSWERS

Those are the questions, and now, how should we approach the answers?

In May 1941, during the battle of Crete, when England was hard pressed to rescue her troops from the enemy-invaded island, it had to be decided just how far this effort to bring off the men should be pursued. As the Army was in mortal peril and the Air could do little, the task fell upon the weary and bomb-torn naval units. To Admiral Cunningham, Commander in Chief of the British Mediterranean Fleet, it was against all tradition to abandon the Army in such crisis. Though faced with the probability of further ship damage and loss, the Admiral declared, "It takes the Navy three years to build a new ship. It will take the Navy three hundred years to build a new tradition. The evacuation will continue."

The point is this: We have already at our disposal the most important tool for meeting any challenge we may face. The traditions of our Service swept up boldly and carried aloft in the hands of Sailors and Marines of character comprise our only means of success.

By our own actions, good or bad, we determine tradition. The traditions, if any, that we leave for posterity will be governed by the character of the officers and men who comprise the Navy and the Marine Corps today.

Character is the one priceless asset. Devotion to truth, to fact, to high standards—together with the ability to accept criticism while so doing, to recognize strength and weakness in others and to be tolerant of them—these are the building blocks that make character.

And now, what is it that has made our present traditions? What part did character play in their making?

First we have the tradition of *absolute loyalty to the country*. Remember the words of Stephen Decatur who said, "My country! In her intercourse with foreign nations may she always be right, but right or wrong, my country!"

Our next great tradition is *Indomitability* and here I am reminded of David Lawrence's dying words, "Fight her till she sinks and don't give up the ship!", and far more recently, the words of Commander Howard W. Gilmore, who ordered "Take her down" and in so doing chose to ride the conning tower of his submerging submarine to his death rather than expose his ship or his crew to enemy gun fire.

The third is the tradition of *Instant Readiness*. Remember the words of then-Captain J. K. Taussig—who in reporting for duty with a squadron of U. S. Destroyers at Queenstown, Ireland, in World War I, after a hard trans-Atlantic passage said, "I shall be ready when fueled." And remember too, less than three years ago, the SIXTH Fleet's response to the Lebanon situation.

We have the tradition of technological superiority. We were the first with frigates, iron-clads, naval radar, naval aviation, and nuclear power.

Finally, we have the tradition of good leadership. No U. S. Navy ship has ever been in the hands of mutineers.

CONCLUSION

I would like to remind you of the words of the President of the United States in his Inaugural Address:

"In the long history of the world, only a few generations have been granted the role of defending freedom in its hour of maximum danger. I do not shrink from this responsibility—I welcome it. I do not believe that any of us would exchange places with any other people or any other generation. The energy, the faith, the devotion which we bring to this endeavor will light our country and all who serve it—and the glow from that fire can truly light the world."

Our tasks are great—our responsibilities no less exacting. Whether we are worthy to stand in the reflected light of those who preceded us we cannot now know. That judgment truly can be made only by those who follow us.

Let it at least be said of us:

They understood their task—

They accepted their responsibilities—

large and small—

They were men and women of courage and understanding—

And above all, they placed Country above Service and Service above self.

ARADCOM Chemical Chief

Maj. Robert B. Barnett has assumed duties as Chemical Officer of the Army Air Defense Command at Colorado Springs. He succeeds Lt. Col. Dick Coburn, who will be assigned in Germany after attending a course at the Army Command and General Staff College, Ft. Leavenworth, Kans.

MARINE CORPS ORDERS:

Col. Bangert Will Go To Naval College; NATO School Awaits L/C Railsback

Commandant—General David M. Shoup
Assistant Commandant—Lt. Gen. John C. Munn
Chief of Staff—Lt. Gen. Wallace M. Greene, jr.

COLONEL

Bangert, Douglas A. 2d MAW, to NWC, Newport.
Dill, James K. 3d MAW, to 1st MAW.

L/C Keevan Gets ARADCOM Info Post

Lt. Col. Edward F. Keevan, jr., who joined the staff of Army Air Defense Command Headquarters in Colorado Springs in January, has been named Chief of the Public Information Division.

Before coming there, he commanded the 4th Missile Battalion, 3d Artillery, a Nike missile unit in the Detroit area.

In 1959, Colonel Keevan was Information Officer at ARADCOM's 5th Region at Ft. Sheridan, Ill.

Also survived by two daughters, Mrs Benedict G Breggeman, Miami, Fla, & Mrs Bradford L Savage, Owings Mills, Md; and her sister-in-law, 1st Lt Clara W Woodruff, USA-Ret, Zephyr Hills, Fla. Burial Tavares.

Army Activates Alaskan Air Unit

The Army's air mobility and supply capability in the far north will be strengthened by activation of a U.S. Army Alaska Aviation Battalion, under command of Lt. Col. Edward C. Podworny, Headquarters are at Ft. Richardson.

Army aviation units at posts throughout Alaska have become a part of the battalion. Additional fixed and rotary wing aircraft and aviation personnel will arrive in the command this summer.

Approximately 480 men and 40 fixed and rotary wing aircraft are currently stationed north and south of the Alaska Range. "When we reach top strength later this year," Colonel Podworny said, "we will have about 850 men and 85 aircraft."

The new strength will include two types of aircraft not currently in Alaska, the HU-1A "Iroquois" gas-turbine helicopter and AO-1 "Mohawk," a turbo-prop medium observation plane. In addition to this, the number of H-21 "Shawnee" helicopters will increase from 20 to 40, and 16 U-1A "Otter" transports will join the battalion.

Also assigned to the battalion are L-19 and L-20 light reconnaissance planes and L-23 twin-engine aircraft.

Col. Symroski To Paris

Col. Charles A. Symroski, Office, Assistant CofS for Intelligence, nominated by the President for promotion to brigadier general, has been reassigned as U. S. Army Military Attache to the American Embassy in Paris, France.

Navy Production Office Moves To Philadelphia

The Navy Production Equipment Control Office (NAVPECO) will move to Philadelphia prior to 30 June.

This is in accordance with plans which were deferred in December 1960 pending additional study and final decision including the future of the Naval Weapons Plant in Washington.

At present, the NAVPECO is only a tenant activity and not a part of the Weapons Plant. Its presence near the seat of the government is not required.

The NAVPECO will be located in buildings at the Naval Air Material Center, in Philadelphia.

SERVICE FAMILY NOTES

Every week, as you can note in this issue, The JOURNAL brings you and your family interesting, informative "Service Family Notes", including Service Wedding and Engagement announcements as well as Births. Here is one of the many JOURNAL features you'll enjoy and find most helpful to keep apace of what your friends are doing. "Service Family Notes" have become *must* reading for JOURNAL subscribers.

This particular feature is just one more reason why it pays to receive The JOURNAL at home, or office, every week of the year. The cost is still less than 15¢ per week. Let's welcome you as a personal subscriber this week. Sign and mail the coupon below today.

ARMY NAVY AIR FORCE JOURNAL

1710 Connecticut Ave., N. W., Washington 9, D. C.

INDUSTRY IN DEFENSE

Admiral Raborn Honored At Paterson

CHAIRMAN and President T. Roland Berner, of the Curtiss-Wright Corporation addresses the Testimonial Dinner for VAdm. William F. Raborn, Jr., Chief of the Navy's Polaris Program, sponsored by the Paterson, N. J., Citizens Committee for the Recognition of Outstanding Achievement. Seated next to Admiral Raborn is his father, who flew with Mrs. Raborn from San Antonio to surprise their son. (Story, Page 18.)

In the foreground is a model of the "Holland I"—the first true submarine developed, built and tested in Paterson and the craft from which all modern submarines can trace their ancestry. The model was presented by Mr. Berner to Admiral Raborn.

Space Threat Radar Sought By USAF

The Air Force is considering an industry competition for development and production of a Space Detection and Tracking Radar.

The 496L (Space Track) System Program Office, assisted by Rome Air Development Center and Lincoln Laboratories, has prepared a "Secret" statement of radar performance specifications to meet future operational requirements. In addition, the 496L System Program Office expects to have available soon a technical report (also "Secret") being prepared by the Rome Air Development Center describing one possible radar design which should meet or exceed the required radar performance characteristics.

Industry may request copies of the document by writing to the 496L System Program Office, 424 Trapelo Road, Waltham, Mass., through the cognizant military security officer.

An Air Force statement emphasized that these documents "are intended only to distribute information and create interest. Proposals are neither solicited nor desired at this time. If the Air Force decides to procure such a radar, a formal industry-wide announcement will be made and requests for proposals will be sent to all interested and competent concerns."

Col. Walter E. Kelly is Acting 496L System Program Director.

\$7 Million To Sperry

Five Navy contracts, amounting to approximately \$7 million, have been received by Sperry Piedmont Company, Charlottesville, Va., for production of gyroscopic and electronic equipment.

Rene A. Vanina, Marketing Manager for the Sperry Rand Division, said the contracts follow previous awards for the production of gyrocompasses, ship's stabilization equipment, submarine depth controls, periscope sextants, and for modification work on Sperry's AN/SPQ-5A radar.

Dr. Gell Is Appointed

Dr. Charles F. Gell, Chief of Life Sciences for the Astronautics Division of Chance Vought Corporation, Dallas, has been appointed Chairman of the Life Science Committee of Aerospace Medical Association.

The appointment was made by RAdm. J. L. Holland, Commanding Officer of the Naval Aviation Medical Center at Pensacola, Fla., and incoming president of the association. Dr. Gell's appointment becomes effective 1 May.

Autonetics Minuteman Chief

Two new program managers have been named for the Minuteman System Management Division of Autonetics, Downey, Calif., a division of North American Aviation, Inc.

M. D. Margolis has been appointed Program Manager for Minuteman Production. T. H. McNary has been named to a similar post for Research and Development. Both positions are new.

Advent Satellite Task Goes To Bendix

A \$17.2 million Army contract to develop the communications system for Project Advent has been awarded to the Systems Division of The Bendix Corporation.

R. J. Sandstrom, Division General Manager, said that Advent's objective, "is to demonstrate the feasibility of a microwave communications satellite that would operate in a 24-hour synchronous equatorial orbit, receiving and amplifying radio signals and re-transmitting them to ground stations thousands of miles from their point of origin. It will mark a new era in global communications."

Development of the communications system already has started under a \$2-million letter contract previously announced. The program is under the administrative and technical management of Army Advent Management Agency and the technical direction of the Army Signal Research and Development Laboratory, Ft. Monmouth, N. J.

The half-ton Advent satellite will orbit

Brunswick Names Service Bowling Chief; Col. Bowers Joins College Of Surgeons

Lt. Col. Charles W. Hanley, USAR-Ret., has been named Special Representative to the Armed Forces for Brunswick Corporation's Bowling Division, it is announced by Milt Rudo, Brunswick Vice President. Colonel Hanley, who will aid Armed Forces bowling proprietors and assist in the management and maintenance of military service bowling programs, retired in 1959 at Ft. Sill, Okla.

Colonel Hanley resides in Elk Grove Village, Illinois, with his wife Elna and son Charles, Jr., who will graduate from Wentworth Military Academy, Lexington, Mo., this year.

Col. Warner F. Bowers, MC, USA-Ret., former Chief of Surgery at Tripler Army Hospital, Hawaii, has accepted the position of Associate Executive Director of the International College of Surgeons in Chicago.

Ryan Builds Army Spares

Award of a new \$280,000 order for navigation set spares by the U. S. Army Signal Supply Agency, Philadelphia, is announced by Ryan Electronics, a division of Ryan Aeronautical Company, San Diego.

This raises the total AN/APN-129(V) navigation set business received by Ryan to near \$6.5 million.

The Doppler navigation set, used in the Army's Mohawk and Seminole reconnaissance planes, is described as "completely automatic, highly accurate and is not reliant on radio aids, wind estimates or true airspeed data."

The self-contained, all-weather device, with surveillance and mapping radar tie-in, automatically and continuously measures heading speed, drift speed, ground speed and drift angle.

Sparrow Buy To Raytheon

The Navy has awarded a \$7.8 million contract to the Raytheon Company for a new advanced version of the Sparrow air-to-air guided missile titled Sparrow III-B.

The new all-weather missile system will become prime armament for the Navy's most advanced supersonic jet interceptor, the McDonnell F4H Phantom II, soon to be deployed with operational forces.

The missile can also be carried by the McDonnell F3H-2 Demon fighters currently equipped with Sparrow III and III-A missiles and deployed with the Sixth and Seventh fleets.

Pluto Award To Marquardt

The Marquardt Corporation, Van Nuys, Calif., has received a \$4 million Air Force contract for further research directed toward the development of a nuclear ramjet engine, Project Pluto.

Marquardt's activities on Pluto have been conducted under Wright Air Development Division-Air Force contracts since 1956. Marquardt's efforts are co-ordinated with the University of California Lawrence Radiation Laboratory, which is responsible for the Pluto reactor feasibility demonstration program.

"Conduct Standards" Directive Issued

From page 3—

subject to the approval of the Secretary of Defense or the Deputy Secretary of Defense. Full-time assignments at field installations will be subject to the approval of the Secretary of the military department concerned.

2. Defense personnel authorized full-time use of official vehicles shall not use such vehicles for other than the actual performance of official duties. Vehicles authorized on a full-time basis shall not be reassigned to others not entitled to such use.

3. Other administrative use of motor vehicles shall be authorized only when official transportation is essential to the successful operation of activities of the Government.

4. Use of motor vehicles, whether authorized on a full-time or trip basis, is not authorized for the official concerned, members of his family, or others, for private business or personal social engagements. Questions with regard to the official nature of a particular use shall be resolved in favor of strict compliance with statutory restrictions.

V. IMPLEMENTATION

Two copies of instructions in implementation of this directive will be forwarded to the Secretary of Defense within thirty days after the effective date of this directive for approval prior to promulgation.

VI. EFFECTIVE DATE

The provisions of this directive are effective immediately.

Lockheed Scientist Is Range Advisor

Dr. Robert S. Schairer has joined the Pacific Missile Range, Point Mugu, Calif., as Chief Scientific Advisor to the Commander, RAdm. J. P. Monroe.

Dr. Schairer comes from the Lockheed Corporation at Burbank, Calif., where he was Assistant Director of Development Planning.

Dr. Schairer completed undergraduate work in the engineering school of Swarthmore College, Pa. He earned advanced degrees in mechanical and aeronautical engineering at the California Institute of Technology.

Ordnance Legal Counsel

C. B. Wegner has been appointed General Legal Counsel of the Los Angeles Army Ordnance District, it is announced by Col. P. H. Scordas, District Commander. He succeeds Mr. J. M. Hunt, who has accepted a position with the California Institute of Technology.

During WWII Mr. Wegner served with the Navy, holding the rank of Commander. He and his wife Elizabeth live at 8597 Happin Way, Los Angeles.

AF Orders More Genies

A \$11.6 Air Force order for Genie air-to-air missiles has been awarded Douglas Aircraft Company, Santa Monica, Calif., for delivery of replacement motors, ignitors, kits and other system parts through June 1962.

The motors will be used to replace over-age motors now in the Air Force inventory. Since award of the first contract in December of 1954, more than \$120 million worth of Genie rockets and spares will have been procured at the conclusion of the new contract.

A nuclear-tipped, unguided rocket, the Genie has been operational with the Air Defense Command since 1957. It is used to aim the F-89J Scorpion, F-101B Voodoo and F-106 Delta Dart.

USS-80 COMMISSIONED; IT'S NOT A SHIP

THE USS-80 has been commissioned at the Naval Electronics Supply Office, Great Lakes, Ill. USS-80 is Remington Rand's trade name for the UNIVAC Solid State-80, intermediate sized, computer.

ESO is the Navy's inventory manager for some 200,000 items of electronic repair parts, currently valued at approximately \$212 million. Inventory control is maintained on a world-wide basis through a distribution system composed of 16 primary stock points located within the United States. In a related function to the inventory control of parts, ESO also produces and maintains an electronic parts allowance list for every Navy ship and station—a major operation by itself, since over 1500 such lists are prepared and kept current each year.

There has been a UNIVAC II, large-sized, computer operational at ESO since 1 July 1958. "The dramatic growth in the field of electronics and an ever increasing defense emphasis on the more exotic weapons systems has caused a continued expansion in the responsibilities and productive efforts of ESO," a Navy statement reported.

To meet this heavy workload, the existing UNIVAC II in the past year has been used at its maximum—3 shifts, 7 days a week. Replacement by a more modern and powerful system was necessary. An extensive study was made of all the then announced equipments that were considered capable of performing the ESO job. The UNIVAC III was selected to replace the UNIVAC II. The new system will not be delivered until about September 1962. The USS-80 has been installed to provide immediate interim supplemental productive capacity to the UNIVAC II system.

First Blow for Liberty: The battles of Lexington and Concord are symbolic of the great Americans who have come to the fore as defenders of our democratic heritage. (Artist unknown)

...in the finest tradition of service

"By the rude bridge that arched the flood," a Colonial patriot fired "the shot heard 'round the world," and thus held the ground of freedom which succeeding generations of servicemen in the U.S. Armed Forces have continued to defend and secure.

We of Federal Services, former servicemen ourselves, have founded a financial institution dedicated to these servicemen. We draw from the noblest archives of freedom an inspiration that is constant and uncompromising . . . an inspiration to serve, always better, those who serve this nation.
